

Product Selection Guide

Smart access control and video intercom systems

Security made simple.

With 40 years of experience in designing and manufacturing market-leading access control security solutions, we are passionate about technology.

We harness the latest available technologies to deliver elegant, useful and practical solutions for our customers. We are constantly striving to make our products simple to buy, install, and use.

We are a manufacturer committed to offering free training and ongoing support to our installers, all backed by our 5-year warranty for peace of mind.

Easy to quote

- Build your system one door at a time
- A range of products to suit any site requirement
- Scalable system – add doors when the budget is available

Easy to install

- Plug and play solutions that connect directly to the network
- Mix and match Net2 products – they are all designed to work together seamlessly
- Clear instructions and color coded wiring labels

Easy to work with

- Industry-leading customer support
- 5-year warranty and three step returns policy
- Free software upgrades and no multiple license fees

5 Networked Access Control

Our networked access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Our door controllers come as IP, wireless or battery powered.

- 6 Wired Controllers - Net2 Plus
- 8 Building Control - I/O Board
- 9 Net2 Readers
- 13 Net2 Tokens
- 15 Net2 Software
- 16 Accessories & Other Components
- 18 Demonstration Products

19 Access Control & Video Management

Our single platform solution combining access control and video management. Paxton10 is an ideal solution to futureproof site security.

- 20 Paxton10
- 21 Integration
- 22 Cameras
- 24 Readers & Tokens
- 25 Software & Apps

26 Phone-based, cloud-hosted access control

Solo is designed to make access control a simple, cost-effective option for sites where traditional systems might not be possible.

- 27 Solo components
- 28 Solo features

30 Video Intercom

Our video intercom system, Entry, is an advanced one cable intercom system with built-in access control capabilities.

- 31 Entry System Components
- 32 Demo Cases

36 Wireless Locksets

PaxLock Pro is compatible with Net2 and Paxton10, or works in Standalone mode. PaxLock is a wireless, electronic battery powered door handle.

- 37 PaxLock Pro
- 39 PaxLock Pro Components

40 Standalone Access Control

Our standalone access control is a non-networked system made up of readers or simple door controllers located at each door. Standalone systems are administered via the use of tokens or card packs.

- 41 Switch2
- 42 Switch2 Readers
- 45 Compact
- 47 Standalone Tokens
- 48 Standalone Accessories

- 50 Additional Information

Welcome

This Product Selection Guide is designed to help you choose the right products to build up an access control system.

Paxton produce a variety of security solutions to suit different site requirements. Our one door philosophy means doors can be added as required or when budget becomes available.

What's new?

Solo

Access control. Reinvented.
Phone-based, cloud-hosted.

With Solo your phone is the system and the key. Use your phone to create and manage the system, then use it to open the door.

- Simplicity of standalone, power of networked
- Built to the highest cyber security standards
- Game-changingly affordable
- Limitless opportunities

See pages 26-29.

Paxton10 Security Enhancements

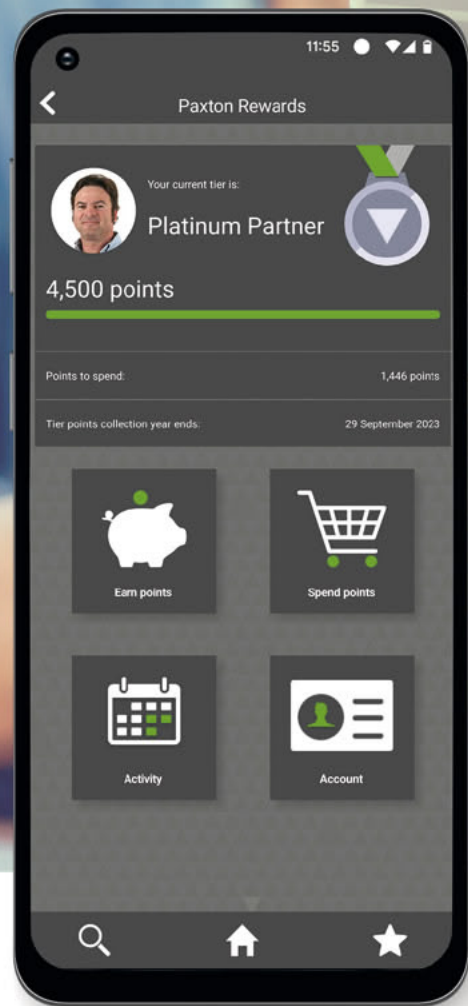

Providing a safer, simpler, more secure solution for your customers; with three new integral features:

- Instantly secure the premises in the event of an emergency with **Lockdown**.
- Real-time **email notifications** of alarms, access attempts, lockdown and more.
- Enhanced protection against cloning attempts with **encrypted credentials**.

See pages 19-25.

Networked Access Control

Our networked access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Our door controllers come as IP, wireless or battery powered.

- ▶ Net2 is Paxton's flagship access control product
- ▶ A powerful networked system that addresses the needs of the mid-market
- ▶ Modular approach for simplicity and scalability
- ▶ Simple intuitive software
- ▶ Range of features that move beyond basic access control
- ▶ A complete solution that encompasses wireless and door entry

Net2 plus Wired Controller

- ▶ A networked IP ready single door controller
- ▶ On-board TCP/IP connection allows direct connection to a network
- ▶ Can connect together with dedicated RS485 network

- 1 x Proximity reader - P50M

Building Control - I/O Board

When a valid fob is presented to the reader, the I/O board can be programmed to trigger the power to elevators, lighting, heating and electrical equipment.

The Net2 I/O board is a simple, yet powerful addition to the Net2 system. It can be wired alongside a Net2 door controller, to switch power on and off to electrical equipment to save money and energy. The Net2 I/O board can control power to elevators, lighting, heating, water and air-conditioning by using the Triggers and Actions application in the Net2 software. These actions can be programmed for a particular time, or in response to a specific Net2 event.

- ▶ Connect directly to a LAN/WAN only
- ▶ Enable integration with elevators, lighting, heating and more
- ▶ 4 inputs and 4 outputs on the Net2 I/O board

Please note, Net2 I/O boards work as part of the Net2 system. They are not door controllers.

Access Control and Video Management

Paxton10 is a single platform solution combining access control and video management. Scalable from 1 to 1000 doors, and 1 to 1000 cameras, Paxton10 is a versatile solution suitable for all building types and sizes.

- ▶ Easy to quote and configure, build a complete system with just five components
- ▶ Manage multiple sites on a single system from anywhere with an internet connection
- ▶ Web-based user interface with no configuration required
- ▶ Paxton10 PRO and CORE cameras give you flexibility and choice
- ▶ Custom dashboards to suit any user requirements
- ▶ Built in **Bluetooth®** to use smartwatch or smartphone credentials.
- ▶ Works seamlessly with Entry and PaxLock Pro

Access Control and Video Management

Paxton10 Access control. Video management. One system

- ▶ Single door controller architecture for ease of install and flexibility
- ▶ Feature rich video management solution embedded in the cameras, no third-party integration required
- ▶ Built-in Bluetooth® wireless technology, supports free of charge smartphone credentials
- ▶ Fully compatible with Entry, our award-winning video and audio door entry solution
- ▶ Fully compatible with PaxLock Pro, our wireless lockset line
- ▶ Distributed intelligence to increase reliability
- ▶ Powerful multiformat readers and keypad, reads Paxton, MIFARE®, HID™ Prox, EM, FeliCa, NFC and DESFire token technology

Paxton Connect

Paxton Key App

Paxton10 Software

A web-based user interface that is intuitive and easy to use.

Accessible from any device with an internet connection, the interface makes remote site management simple. The software comes as a native part of the system with a Paxton10 server. It has a range of intelligent features to maximize efficiency and optimize the combined access and video management solution.

- ▶ Free of charge – simple online updates with no ongoing license fees
- ▶ Suitable for touchscreen and desktop devices
- ▶ Optimised for use on PCs and tablets
- ▶ Flexible and secure remote access
- ▶ Email notifications of system events

Features:

Dashboards - Customized dashboards to suit any user requirements

Reports - Powerful reporting engine where all system events and videos can be reviewed

Site plans - For the visual management of the system

Tutorial wizards - Support new and existing users to make full use of the software

People - Manage user permissions, credentials and information

Rules - Set permissions, time profiles, triggers and actions and much more

Devices - Configure and manage the devices in a building

Lockdown - Instantly secure the premises in the event of an emergency

Paxton10 Apps

Paxton Connect

Flexible site management

The Paxton Connect app provides easy and flexible site management for Paxton10. Containing easy to use features in one smart user interface, Paxton Connect enables you and your customers to manage multiple sites remotely from a smartphone.

Features:

People - Manage user permission, credentials and information

Reports - Access all system reports from your smart device or tablet

Devices - Configure and manage all devices on site

Dashboards - Access custom dashboards for personalized system overview

Paxton Key

Utilize smart devices as access tokens

The Paxton Key app allows system users to make use of their smartphone or smartwatch in place of traditional tokens. These are called smartphone credentials and can be issued free of charge. Utilizing the built-in Bluetooth® wireless technology in Paxton10 readers, the smart device can securely communicate with the Paxton10 system to grant or deny access. Paxton Key also enables the user to carry out predefined building management functionality – such as setting the intruder alarm.

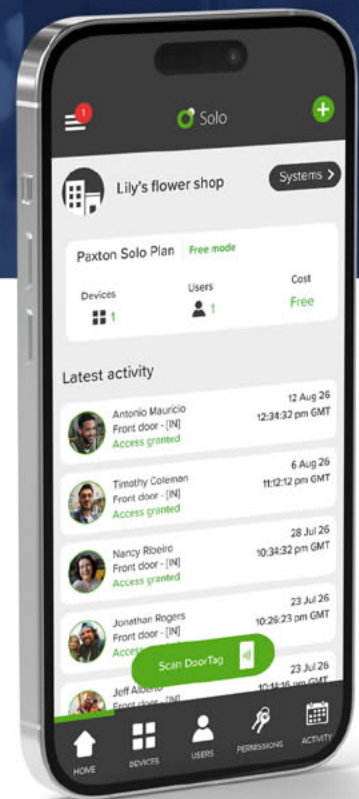

Download the free apps from the **App Store** or **Google Play**

Phone-based, cloud-hosted access control

Solo is a smart, convenient, connected access control solution. Use your phone to create and manage the system, then use it to open the door. With the simplicity of standalone and the power of networked; Solo is designed to make access control a simple, cost-effective option for sites where traditional systems might not be possible.

- ▶ Infrastructure-free with no on-site data network needed
- ▶ Door access and system administration from the same simple app
- ▶ Cloud-hosted with minimal system maintenance
- ▶ Built to the highest security standards
- ▶ A complete solution that offers recurring revenue options

Solo Access control. Reinvented.

- ▶ No wiring, only power required
- ▶ Simple single-door architecture
- ▶ Quick commissioning via the Paxton Solo app
- ▶ Controller communicates with the Paxton Solo app via secure Bluetooth® connection
- ▶ Passive NFC DoorTag replaces traditional reader

Paxton Solo app

With Solo your phone is the system and the key. Use your phone to create and manage the system, then use it to open the door.

From system setup and hardware configuration to ongoing reporting, adding users and setting access rights, and even gaining access through a Solo controlled door, Solo requires one app to manage all elements of the system.

App features:

Centralized administration - Manage all sites, systems, users and access permissions in one place. With real-time updates available to all system administrators, on their own devices.

Live events - View events in real time or as a full event log so that you can review historical events.

Access levels - Quickly and easily apply the same access permissions to groups of users.

Time profiles - Define active time periods for simple access management, then apply to access levels to control when users can move around the site.

Unlimited doors and users - An unlimited number doors and users can be added to a Solo system.

Smartphone access - No need for physical cards or fobs. Get more from the tech in your pocket with simple smartphone access through Solo controlled doors. Use the built in biometric ID for an additional layer of authentication.

Offline access - No internet? No problem. Solo works to allow access through a controlled door even if your phone has no connection.

Solo subscriptions

Free mode allows a Solo system with a single door and single user to run without a subscription indefinitely.

For single door systems with multiple users, or for any subsequent doors, a \$6 per month (MSRP) per door/per month subscription applies. With Solo, it's easy to generate ongoing revenue opportunities with your customers.

Subscriptions can only be paid using Solo Credits.

Purchasing credits from approved Paxton distributors

Credits are available to purchase from all approved Paxton distributors. Each credit is charged at \$1 (MSRP); every Solo controlled door requires 6 credits per month to remain active. Solo - Credits (sales code 150-099-US) can be purchased in any quantity.

Purchasing credits as in-app purchases

Solo system engineers can also use in-app purchases in the Paxton Solo app to acquire the relevant credits for their system. Credits are available in blocks of 10, 20, 50, 100, and subsequent iterations of 50 up to a maximum of 850. Credits are charged at \$1 (MSRP) each.

The Paxton Solo app is available to download for free from the **App Store** or **Google Play**

To ensure the best possible experience and up-to-date security, Paxton mobile apps support the latest major versions of iOS and Android, as well as the two preceding releases. Devices running older versions may remain compatible, but are not officially supported by Paxton.

Video Intercom

Entry is a video intercom system that works standalone or alongside Net2 access control, combining door entry with key features of Net2.

Entry is a scalable solution, allowing expansion of up to a hundred panels and a thousand monitors.

- ▶ Just 3 components - monitor, panel and door controller
- ▶ Premium, standard, audio, and vandal resistant solutions available
- ▶ Intruder alarm integration - set the alarm in Net2 from the Entry panel for extra convenience
- ▶ Pan/tilt camera functionality to capture an angled view
- ▶ Low light sensitivity camera - ideal for use day or night
- ▶ SIP compatibility - the door can be answered from cell phone, tablet or PC
- ▶ Add a secondary IP camera for higher security sites

Entry

A smart, simple video intercom system.

- ▶ Panels available in three variants: the Entry Touch panel with an advanced 7-inch color touch screen, Entry Standard panel in anthracite grey and the Entry VR panel in super durable stainless steel
- ▶ All variants available in flush, surface and rain-hood versions - suitable for a range of environments
- ▶ Three monitors available, including premium, standard and audio, to create a custom solution for any site
- ▶ Personalize the Entry Touch panel, premium monitor and Standard monitor with multiple theme options and contact images for quick visual recognition
- ▶ Video voicemail, enables visitors to leave a video message
- ▶ Add a secondary IP camera for higher security sites
- ▶ Reads Paxton and MIFARE® token technology

Standalone Entry system does not require connection to a network or server

Entry now works Standalone

Our video intercom system now works in standalone mode for a quick, simple installation and easy user management with our standard enrolment and shadow cards. Offer a flexible system that can grow in line with your customers' requirements and be upgraded to an online Net2 solution, with no hidden costs.

- Enable offline token-based access control on any Entry site
- Simple user management utilising Paxton's standalone functionality
- Upgrade existing standalone sites with video door entry for extra convenience
- Combine with other Paxton standalone products to build an entire easy-to-use system supporting the same tokens across the site
- See Standalone card packs on [page 45](#)

Watch the Entry Video

Show your customers the benefits of our simple video intercom solution in just two minutes, with the Entry video.

- ▶ Featuring the whole Entry range, including the touch panel and premium monitor
- ▶ Just 3 components that auto-detect on set up
- ▶ Discover a scalable solution that suits a variety of locations

Watch it here:

Standalone Access Control

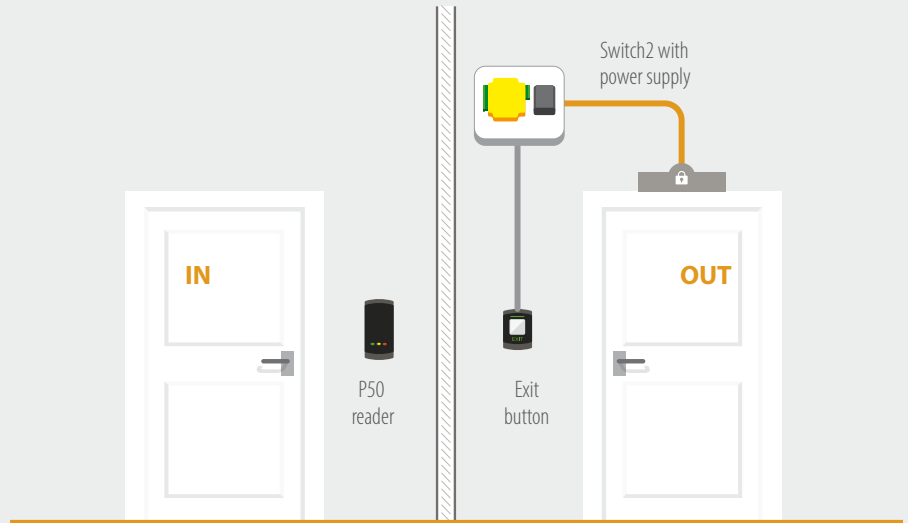

Standalone access control is the simplest way to secure and control access through doors around your building. If you're looking to step up security, protect your staff and assets and save money, then Standalone access control is for you.

- ▶ A non-networked access control solution
- ▶ Simple and unique card management system
- ▶ Internal (Compact)/external (Switch2)
- ▶ Suitable for small to medium sized premises, or any site looking to secure a small number of doors
- ▶ Entry and PaxLock Pro now work in standalone mode

Switch2

Switch2 is a standalone system that comes as a separate single door controller and reader. The door controller is fitted on the secure side of the door, with the reader fitted on the other side. Switch2 offers a secure solution for customers wishing to control door access, who do not need the reports on users' movements provided by a PC based access control system.

Entry

Our video intercom system works in standalone mode for a quick, simple installation and easy user management with our standard enrolment and shadow cards. Offer a flexible system that can grow in line with your customers' requirements and be upgraded to work with Net2 or Paxton10, with no hidden costs.

See [page 35](#) for more information

PaxLock Pro

PaxLock Pro is our wireless access control solution in a battery operated door handle. It can be installed in standalone mode for use on sites not requiring the additional functionality of an online system. It's flexible upgrade path from standalone to networked creates a solution which can evolve with the needs of your customer.

See [page 36](#) for more information
