

# 2N Access Commander Box 2.0

The 2N Access Commander Box 2.0 is a powerful minicomputer that comes with pre-installed software to allow you to manage your access control system. You don't need your own hardware or access to an existing server. Just unbox it, plug it in, and start managing!

- Plug-and-play solution
- Compact design
- No server required

The compact design allows you to install this computer easily - even in environments with limited space. The fanless design guarantees quiet and reliable operation, and the user-friendly web-based configuration makes it easy to manage your access control system.

Member of the AXIS group

The 2N Access Commander Box 2.0 also includes a basic licence for up to 5 devices. System administrators can start using it immediately in smaller installations. In large-scale installations, you can use one of the paid licenses. Simply order it and upload it to your system.

## Variant
