Options and Accessories

SILENT ELECTRIFICATION MOTORIZED LATCH RETRACTION

- The SE Motorized Latch Retraction option provides near-silent operation for quiet environments such as hospitals, offices, hotels, and libraries where solenoid-driven devices would be disruptive.

ELECTRIC LATCH RETRACTION

- The LR option uses a solenoid mounted in the pushbar for instantaneous unlocking and locking of the exit device from a remote location or access control device. LR option is not available on rim type exit devices (see EL option).

ALARMED EXIT DEVICE

- This battery-operated option emits a loud (95 decibel) alarm to notify management of unauthorized exit. Available on minimum opening width 36". Cannot be ordered with other exit device options.

REQUEST TO EXIT (REX) – MONITOR / SIGNAL SWITCH

- Mounted in the exit device pushbar on the hinge end, the switch can be used to activate signal light, horn, monitor, or other devices.

CYLINDER DOGGING

- For management control of dogging exit devices for life-safety exit devices only.

ELECTRIC DOGGING

- A holding magnet keeps the pushbar depressed (set manually) and the latch retracted for lower profile exit devices, resulting in less damage and quieter operation.

MATCHING END CAPS

- Matching end caps are available for applications where it is preferable that the end caps match the finish of the exit device. Available for US Finishes only.
