

KEYPAD PROTECTOR

This tough clear polycarbonate cover helps to extend the life and reliability of digital keypads, access control and security panels by protecting them from accidental or intentional damage and tampering. Suitable for flush mount applications, the cover can also be supplied with a key lock facility (STI-6560) for additional security.

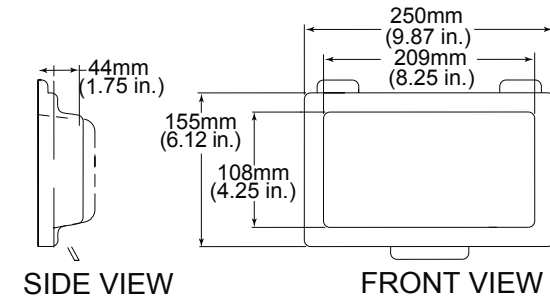

Installation Data for STI-6550 & STI-6560

Flush Mount Application

1. Position the Keypad frame over the device to be protected and mark the position for the four fixing screws.
2. Drill the holes, using a 6mm masonry drill bit and insert the rawl plugs provided.
3. Assemble the cover and frame to create the hinge mechanism. Install the assembled Keypad cover to the wall using the fixings provided.

Weather gasket set

1. For weather proof installations ensure that the adhesive side of the weather gasket faces the wall.

INSTALLATION TOOLS REQUIRED

1. 6mm masonry drill bit
2. Philips head screwdriver

KEYPAD PROTECTOR ACCESSORIES

- STI-6582 Backplate (irregular surfaces)
- STI-6552 Weather gasket set
