

OH600 / OH601 Series Flush Panel Backbox/Housings

OH600 / OH601 FLUSH BACKBOXES

The Alpha Communications® models **OH600** and **OH601** are flush mounting backboxes. The **OH600** is made of galvanized steel and the **OH601** is made of steel, painted in a Grey powder coat epoxy painted finish for durability, or in galvanized steel. They are our most popular flush mounting boxes, and are used with a variety of flush mount intercom entry lobby panels, and remote intercom stations.

The painted boxes are finished on top, bottom, both sides, and the back and both models have standard electrical knockouts on the top and bottom (when mounted vertically), to allow for wire access. These boxes are designed to be attached to mounting studs or set directly into a concrete or masonry wall.

An adjustable 'tinnerman' mounting clip on the top and bottom (when mounted vertically) allows the finished panel/station to be mounted level, even if the back box is installed slightly crooked.

They are typically used with the **ES612**, **AM612** and **AM642** series lobby entry panel stations, but can be used with other stations as well. The **OH600** can also be used with the **IR150SS** area of rescue assistance remote station(s), when mounted horizontally.

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The flush back box(es) shall be Alpha Communications® model **OH600** or **OH601** or approved equal. The **OH600** shall be made of galvanized steel and the **OH601** shall be made of steel, and painted in a Grey powder coated epoxy finish, or of galvanized steel. All models shall have standard electrical knockouts on the top and bottom (when mounted vertically), to allow for wire access.

Contractor shall observe all local and national electrical and building codes.
