## SARGENT Introduces Mechanical Trim for Passport 1000 P1 and P2 EK1 Retrofit Kits

SARGENT is pleased to announce the availability of mechanical trim for use with Passport 1000 EK1 Exit Device Retrofit Kits in double door applications. This option ensures a consistent aesthetic across both doors.

Passport 1000 EK1 retrofit kits make it easy and cost-effective to add the advanced access control capabilities of Passport 1000 P1 and P2 campus locks to existing Von Duprin 98/99 Series rim exit devices.

SARGENT Passport 1000 IP-enabled locks connect to existing networks using non-proprietary and industry standard equipment, dramatically reducing cost and simplifying installation. Using magstripe, PIN code, and contactless technologies, they work with ASSA ABLOY's PERSONA Campus™ Software or approved third party software for comprehensive access control in campus facilities.

The Authorized Channel Partner (ACP) program is open to resellers who sell ASSA ABLOY's technology products to certified integrators, and help with product selection based on the application.

Updated Passport 1000 catalogs, pricing, and installation instructions are available in the Partner Area on [IntelligentOpenings.com](http://IntelligentOpenings.com).

For additional information, contact your ASSA ABLOY Door Security Solutions sales consultant, call SARGENT at 800-727-5477 or visit [www.sargentlock.com](http://www.sargentlock.com).
