

COMPACT SOLUTIONS

Comprehensive Protection in a Small Package

Small equipment is the lifeblood of an office, but often overlooked due its size. Keeping this equipment functioning properly is a significant step to increase employee productivity and satisfaction.

ESP's Compact Solutions provide Multi-Stage power protection and conditioning to safeguard small printers, scanners, fax machines, mailing machines, and desktop equipment from the effects associated with power disturbances.

ESP's technology incorporates a series combination of varistors and a three-terminal gas arrestor that suppresses both normal and common mode surge energy. They protect smaller equipment from harmful surges, spikes, high-speed transients, and electronic noise events that can cause error codes, misfeeds, paper jams, color quality degradation, downtime, and customer dissatisfaction. Their compact size makes them easy to install behind or beside equipment to keep them out of view.

FEATURES:

- Multi-Stage power protection
- EMI/RFI noise filtration
- Power over Ethernet protection (on all networked products)
- Compact design

Model	Plug Config.	Outlet Config.	Network Protection
MFP-1	120V/15A	5-15R  x1	Yes
MFP-2	120V/15A	5-15R  x1	Telephone Only
MFP-4	120V/15A	5-15R  x1	Ethernet Only
S1	120V/15A	5-15R  x1	No

ESP's Compact Solutions are the perfect choice to keep smaller equipment running without disruption.
