Micro Surface Mount Switch Set

WWW.GRISK.COM

INSTALLATION APPLICATIONS

The Micro 500 switch is aimed at residential applications where aesthetics and small size are a consideration when choosing a switch. It offers the installer alternative wire configurations as well with either end or side leads and a choice of wire length. This helps to make installations and connections quick and easy as well as saving you time and money. Available in regular gap of 1/4"+. The flexibility of its small size allows it to become part of the existing decor as it can be mounted and hidden, for example, in the tract of a sliding door or crank out window. Offered in white and brown, both switch and magnet come with 3M double sided tape attached. Also available as switch only or magnet only.
