

Tools and Testers

STM-8 | Regional Availability – Global

The STM-8 is an economical and versatile hand-held tester designed for testing UTP and screened (ScTP) cable for opens, shorts, reversals, mis-wires, split pairs and cable length. Its rugged state-of-the-art construction, easy-to-read LCD display, and multiple remotes allow one person to quickly test and identify up to four different cable runs from one location.

1. Battery

A low battery status indication is provided, as well as automatic shut-off to extend battery life.

2. Length Testing

Test cable runs up to 900m (2950 ft.).

3. RJ45 and RJ11 Compatible

Indications for 6- and 8- position jacks.

4. Line Voltage

The presence of line voltage is indicated on the display to help prevent accidental damage to the unit.

5. Universal Plug

The UTP modular cords are equipped with patented "universal" plugs, that fit any standard 6- or 8- position jack.

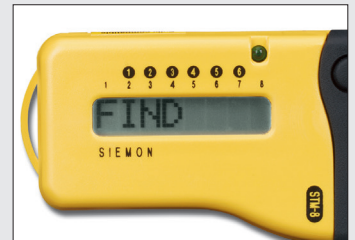

6. Remotes

Additional remotes can be purchased separately.

Testing

Tests all wiring configurations – T568A, T568B, USOC, 10BASE-T, Token Ring, and TP-PMD.

FIND Mode

In FIND mode, the STM-8 will detect and identify which wiring scheme is present in the cable being tested.

LENGTH Mode

In the LENGTH mode, the STM-8 will determine the distance measurements on any given cable up to 900m (2950 ft.).
