

Use the Cleerline SSF™ Cable Slit and Ring tool to prepare cables up to 6.4 mm (0.25 in) in diameter. The SSF-FCS1264 is built with adjustable blades for slitting and ringing cables. Additionally, the reversible “V” block allows different sizes of cables to be slit with accuracy.

Blade depth can be changed using the adjustment knob at the top of the tool.

The adjustable V block at the front of the tool can be removed and rotated. The smaller “V” fits 1.2 - 3.2 mm cables, with the larger “V” for 3.2 - 6.4 mm cables.

The SSF-FCS1264 is lightweight and compact, making it an excellent addition to any kit.

### FEATURES AND BENEFITS

- Works with 1.2 - 6.4 mm cables (0.05 - 0.25 in)
- Adjustable “V” block for slitting
- Adjustable blade depth

### COMPATIBLE CABLES INCLUDE
