

VARIO

covers every angle

rayTEC®

vario is a complete family of Infra-Red and White-Light low voltage illuminators delivering the ultimate in functionality, flexibility and reliability.

Key Features

- VARIO interchangeable lensing
- VARIO remote control
- VARIO LED status indicator
- VARIO Hot-spot reduction technology

Benefits

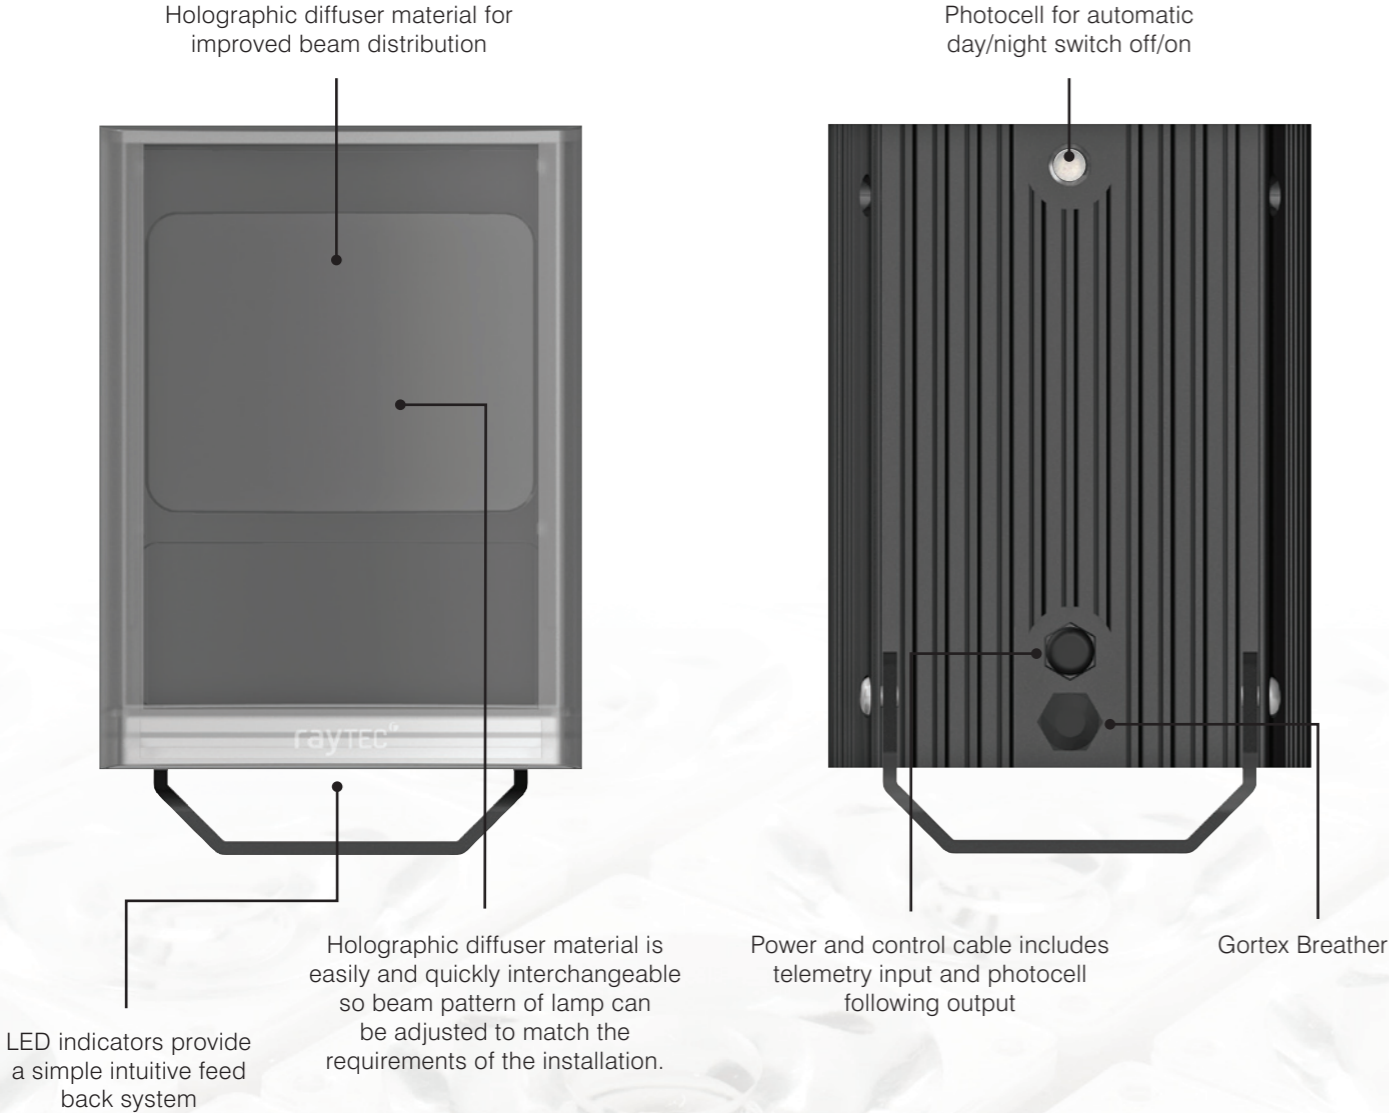

- Angle of illumination can be easily, quickly and precisely adjusted
- Set-up quickly and safely from ground level
- Quick operational feedback on status and performance of illuminator
- Elliptical beam patterns with holographic diffuser deliver more even illumination preventing over exposure of foreground objects, for excellent images and less vertical light waste

Covers Every Angle

Ultimate Functionality & Flexibility

In addition to interchangeable lensing, VARIO offers the ultimate functionality and flexibility via its remote control set-up, which can operate multiple units.

VARIO LED Status Indicator

Green indicator status LED indicates unit is receiving correct input voltage and is working correctly.

Amber Indicator status LED indicates unit is receiving a valid command from remote control device

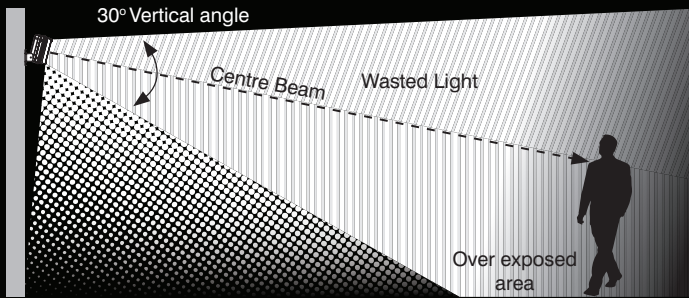

Red indicator status LED indicates either invalid command received from remote control or there is an issue with the input voltage of the unit.

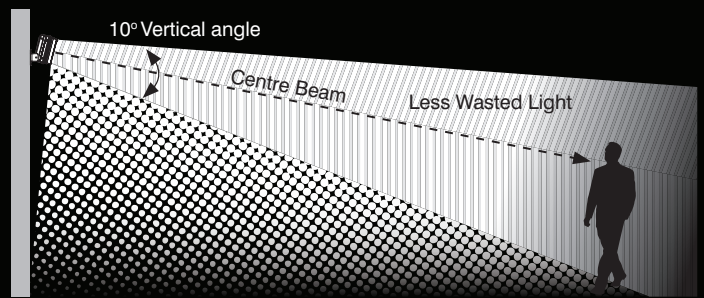

Hot-spot Reduction Technology

VARIO elliptical beam patterns with holographic diffuser enhance the even illumination to standards far in excess of normal LED illuminators, preventing the over exposure of foreground objects, for excellent CCTV images at night and less vertical light waste.
