

Gateway Mounting Bracket

The Primex GB7 Gateway Mounting Bracket is a holster-style bracket that easily and securely mounts the Ignite WiFi Gateway (Gen 2) / XB7 gateway onto a wall or within a Primex SOHO Pro Media Panel.

Simply affix the bottom half of the mount to a wall stud, electrical outlet bracket, or media panel, slot the Gateway in, then secure the top portion with the snap locks.

The mount provides ample airflow for cooling and doesn't obscure the Gateway label for service.

Features & Benefits

- Rigid, low-profile mount that allows the Ignite WiFi Gateway (Gen 2) / XB7 gateway to be mounted directly on a wall or within a Primex SOHO Pro media panel
- Unique locking system easily and securely holds the Gateway while providing tamper-resistance
- Custom-formed to adhere to the dimension of the gateway while providing ample airflow and service label visibility
- Mounting holes align with standard electrical gangboxes for placement over a single-gang wall bracket
- White finish for low-profile aesthetics that match the Gateway and end-user decor
- Interchangeable single piece design for the top and bottom means the installer never has to worry about matching two different parts
- High-quality engineered plastic made in North America for long-lasting durability
- UL/cUL listed

Installed on-wall

Installed in SOHO Pro media panel
