

VISTA® H3 Hybrid Series Wireless Keypads

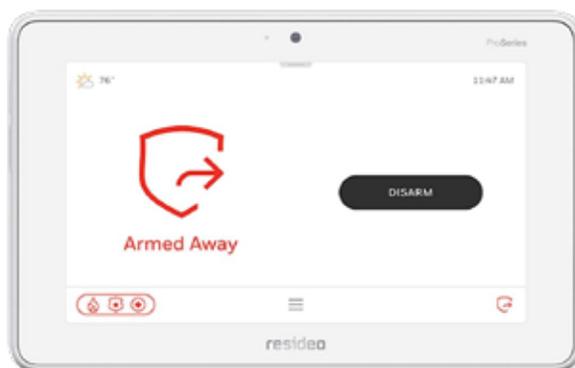

VISTAHTCHWLC 7" Wireless Touchscreen

The VISTAHTCHWLC has a large 7" high resolution color touchscreen display with an intuitive and easy to use menu driven interface making it the perfect keypad option for security and home automation control. Voice annunciation of system status and alarm conditions help during emergency situations.

The installation is wireless saving you installation costs making this a perfect choice to easily add on more keypads per system when end-users want them. The keypad can have the software updated remotely over WiFi giving your end users the latest features while alleviating costly service call on site visits. It can be used to program the VISTA H series hybrid systems if AN360 is not an option.

The built-in Camera that can take a picture of who is disarming your system giving you that added layer of security knowing your property, family and employees are not compromised. You can choose up to 4 different languages (English, French, Portuguese and Spanish) on the same keypad.

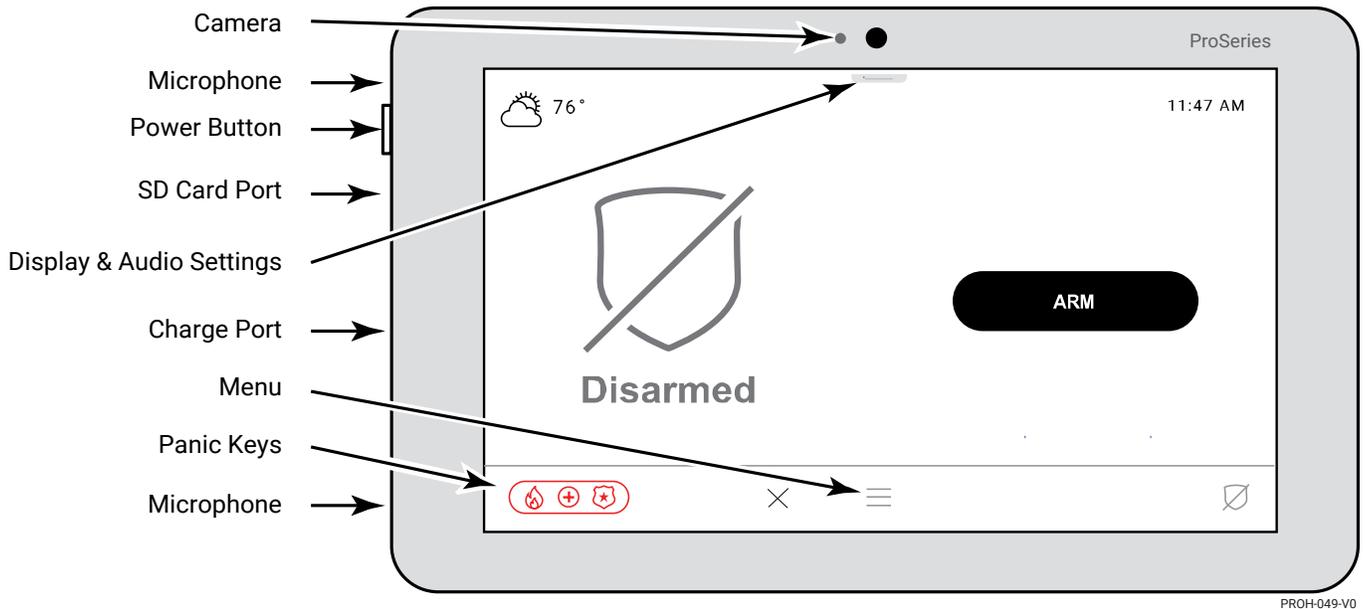

There is a wall mount (PROWLTOUCHWA) and a desk mount option (PROWLTOUCHDM) to fit any installation application, and both will recharge the touchscreens battery. The wall mount option has backplate designed to cover over any 6160 or 6290 takeover installs.

VISTAHTCHWLC 7" Wireless Touchscreen
