

## New Product Announcement

### PowerG+ Heat Detector

**Date:** Thursday, July 24, 2025

**Region:** North America

**Product:** PowerG + 915 Heat Detector

**Brand:** DSC

### Overview

We are pleased to announce the launch of the PowerG\_+ Heat Detector 915MHz in NA. The PowerG + Heat Detector incorporates the next generation of PowerG technology and includes many enhancements to the device itself. It is a wireless heat detector with a fixed temperature, a rate of rise heat sensor, and an internal piezoelectric sounder.

### Features and Benefits

Feature	Benefit
Improved Battery life	Up to six year under normal usage.
** Battery Level Reporting	Batteries now report their current battery level to the panel where technicians can view the current voltage in the System Test menu.
** Dealer Lockable Sensors	Dealers have the option to lock down sensors to their dealer ID, preventing them from being taken over.

** Two-factor Authentication Enrollment	When enabled, this is an added layer of security where the device follows two-factor authentication, requiring the technician to enter the device PIN code on the panel to complete enrollment.
Battery Pull Tab	Once the pull tab is removed, the device enters pairing mode, saving valuable time during the install.
Modern Look and Feel	The look and feel is more modern and more visually appealing. The device comes in a white matte finish

\*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as a PowerG Heat Detector

## Compatibility

- IQ Panel 4\*
- IQ4 Hub\*
- IQ4 NS\*
- IQ Panel 2
- IQ Pro
- PowerMaster
- Absoluta
- PowerSeries NEO
- PowerSeries Pro

\*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as a PowerG Heat Detector

## Approvals and Certifications

FCC/ISED Canada certified, UL/ULC Listed under uL521 and ULC-S530 and CSFM listed
