

VSM

Management Platform for VIA Devices

VIA Site Management (VSM) is a software application that allows an administrator to manage, monitor and make changes to all connected VIA GO, VIA Collage, VIA Connect PRO or VIA Campus gateways

FEATURES

- Deployment - Easily on-board all your VIA devices across networks
- Management - Organize VIA devices and create settings templates
- Configuration - Set defaults and configure features
- Health Checking - Monitor storage level, On/Off statuses, and current firmware version
- Usage Analytics - Create usage reports for all of your VIA devices
- Alerts - Set customized messages to display on VIA screens as needed
- Digital Signage - Manage content, create templates and schedule campaigns
- Automated Device Updating - Schedule and automatically push new firmware updates
