

CDL101T AlphaTeller™ LED Corridor Light with built-in Piezo Buzzer

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The LED corridor dome lights with built-in piezo type buzzers shall be Alpha Communications® AlphaTeller™ CDL101T (24VDC) or approved equal. Lights shall include a translucent plastic cover mounted on a flame retardant ABS plastic panel, with a removable divider to allow full height LED brightness. Units shall mount over a conventional 1-gang or 2-gang electrical back box. Units shall feature a high brightness long-life LED to eliminate the need for bulb replacement.

Built-in piezo buzzer shall sound as long as the Call Placed button is pressed (activated) on the VTS110 teller call station associated with that specific CDL101T dome light.

Contractor shall observe all local and national electrical and building codes.

CDL101T ALPHATELLER™ LED CORRIDOR LIGHT WITH BUILT-IN PIEZO BUZZER (24VDC)

The Alpha Communications® CDL101T (24VDC) LED Corridor Lamps provide both visual and audible indications of a teller call.

The CDL101T is typically used with the AlphaTeller™ teller call system, but can be used with an emergency call system or in any application where this type of audible and visual call indication is needed. The standard mounting plate accommodates features an easily removable divider to allow full height LED brightness.

FEATURES

- Excellent Visibility
- Audio call indication
- High Brightness LEDs - No Bulb Replacement
- Durable construction
