

PowerG + Water Tile with Freeze Detection

STOPPING LEAKS FROM BECOMING LAKES

"We find [the PowerG + Water Tile] WAY easier and less time-consuming to install than the old models, and I'm really excited about both the low temp and buzzer feature. Often we install 5+ of these devices in a home and having the buzzer allows the client to find and respond to the alerts in real-time much easier than the old way, so I'm excited."

COST OF WATER DAMAGE

Water damage strikes more homes than fire - and it's happening every single day. With rising costs and increasing risks, protecting homes from internal flooding is no longer a luxury - it's a necessity.

Annual Payouts

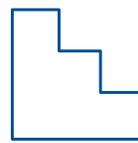

\$13 billion in annual insurance payouts for non-weather related water damage. This includes burst pipes, appliance leaks and plumbing failures.

Average Claim

\$13,954 in average insurance claim cost. This payout is for internal water damage and freezing. Burst pipes and appliance failures are the leading sources of damage.

Basement Risks

98% of basements experience water damage, with flooding from seepage, sump pump failure and plumbing issues as the leading causes.

Daily Impact

14,000 homes are affected daily. U.S. homes statistically are experiencing non-weather related flooding each day. Homes are more likely to suffer from water damage than fire.

MEET WATER TILE W/ FREEZE DETECTION

Water Tile is a smart, wireless sensor designed to detect leaks and freezing conditions at 41°F (5°C) before they cause costly damage.

Powered by PowerG technology, it offers long-range communication, up to 5 years of battery life and flexible placement options with accessory cables* for expanded coverage.

Instant Leak Alerts

- 1** Audible notifications and external sensing cable support help catch leaks early and reduce costly damage.

Reliable Coverage

- 3** PowerG + enabled communication ensures strong signal across large homes and basements, with IP65-rated durability.

Easy Setup

- 5** The multifunction button simplifies enrollment as well as resets, and muting — no tools required.

Freeze Detection

- 2** Integrated low temperature alerts help prevent pipe bursts before they happen.

Smart Power

- 4** Up to 5-years of battery life, low battery alerts and accessory cables simplify maintenance and extend detection into hidden areas.

*sold separately

SMARTER TOGETHER

Pair the Water Tile with the IQ Panel and IQ Water Valve for a complete, automated water mitigation solution.

- Leak detected by Water Tile
- Alert sent through the IQ Panel
- Water shut off by IQ Water Valve

WHY DEALERS CHOOSE JOHNSON CONTROLS

- Trusted innovation from a global security leader
- Seamless PowerG+ ecosystem integration
- Dealer-first features like lockdown and OTA updates
- Sleek, modern designs homeowners love
- Global support across NA, LATAM and EMEA
