Engineered to Meet Your Specific Needs

Belden has leveraged its engineering and manufacturing expertise to bring you the most reliable cable, connectivity, enclosure and active systems solutions available...with the largest selection of products and the industry's most trusted technical support and service.

This catalog of Cable Management products reflects the same quality and reliability you've come to expect from Belden for the housing and storage of data, broadcast, security and other equipment. Engineered for optimal cable routing, ease of installation and maximum convenience, Belden racks and enclosures have also been designed to match the unique requirements of various industries and applications.

This table will help you select the Belden rack and enclosure family that best suits your specific application. If you have a need for any custom design or a special application, please call us for assistance. Our Cable Management teams have many years of experience in modifying and customizing enclosure designs to suit many different requirements.

With thousands of products available, Belden is uniquely positioned to meet your signal transmission needs.

Choose Belden racks and enclosures along with other Belden products to round out your purchase for a complete solution to your infrastructure requirements in a commercial enterprise, broadcast studio, industrial facility or other environment. In addition to cable management products, Belden offers a broad selection of:

- Copper cable and connectivity
- Optical fiber cable and connectivity
- Patch cords, harnesses and cable assemblies

- Wireless LAN systems
- Power over Ethernet (PoE) products
- Switches, other active devices and connectors for industrial and large infrastructure applications

Bundling your product purchase from Belden has many advantages and affords you benefits of the Belden brand for all of your product purchases:

- Greater convenience
- Assurance that all components will work together
- The most reliable product performance in the industry
- Dependable service and superior support

- The most trusted name in the industry
- The industry's largest global sales and distribution network
- Assurance you will be *Sending All The Right Signals™*

Refer to Belden's *Signal Transmission Solutions* brochure which contains illustrations of various applications for Belden products to find out what products can be bundled for your specific application. Your brochure copy is now available to download from www.belden.com, or call a Belden sales office listed on the back cover of this catalog.

Networking Racks & Enclosures

Advantages in Using Belden Networking Enclosure Series

Engineered to Meet Your Specific Needs

The Networking Series of enclosures and racks has been designed to meet the unique requirements of building and campus networks, data processing systems and server farms – from the Data Center to the telco closet.

These enclosures provide the flexibility and versatility needed to house and protect servers and other delicate electronic equipment, and allow the right amount of room needed for proper functioning.

Features

Construction

- Welded frame construction for greater strength and support.

Cable Management

- Numerous top and bottom entry points for easy configuration to match your needs.
- Cable access top features a 14.25" x 4" rubber gland which helps prevent dust from entering the enclosure.

Ease of Installation

- Sliding rails can be adjusted after installation to allow for cable management and different depths of equipment, without removing terminated equipment.
- EIA rails are numbered in rack space increments.

Temperature Control

- Perforated tops and cooling devices are available as options and presented in the following pages. Most enclosures can be customized for AC cooling with side mount AC units, available from 1,000 to 20,000 BTUs.
- Perforated and vented doors, plus a variety of top panel options, provide effective passive convection cooling.

Power Distribution

- A complete selection of Power Distribution units are detailed in the Components and Accessories section of this catalog.

Accessories

- A full complement of accessories will outfit your enclosures with the needed mounting, shelving and cable management support.

Aesthetics

- Finishing processes include anodizing, iridizing, painting and powder coating.

Aesthetics can be tailored to your requirements with a variety of door and panel options, including use of glass, finishing colors and even company identity graphics.

The enclosure shown here is the XUSD Style (Ultra Deep Server Enclosure).

Belden Networking enclosures are designed and manufactured for ease of installation, to provide reliable protection of your sensitive electronic equipment and to optimize cable management.

Networking Racks & Enclosures

Advantages in Using Belden Networking Enclosure Series (Continued)

Features and Benefits

The following features are also standard on all Belden Networking Enclosure Series.

Reversible Doors

Front and Rear doors are manufactured with spring loaded hinges for easy toolless change of door swing in the field from right- or left-hand hinge options. Reversible door, lift-off side, tempered safety glass, adjustable mounting racks.

Lift-off Side Panels

Quick disconnect lift-off side panels with flush surface lock.

Cable Access Top

Rubber gland access, 14.25" x 4" opening, prevents dust from entering.

Tempered Safety Glass

Strengthens door and enhances the overall appearance; no static discharge, made with non-combustible material, tinted bronze glass, is easy to clean and non-scratching.

Adjustable Mounting Rails

Mounting rails are designed to EIA-310 standard and are available with 10-32 or 12-24 tapped holes, or square holes accepting a 6mm cage nut. Rail depths are fully adjustable, even when equipment is mounted. All rails feature convenient RU marking.

Casters and Levers

Casters and levelers are included with each standard Networking Enclosure order. Casters are used only to reposition enclosures; levelers are used at all other times to maintain a stable position.

Cable Gland Plate

Adjustable bottom plate minimizes the amount of dirt and dust entering the enclosure. (XST, XDP and XSL only)

Security

Locking doors and side panels with flush handles. Custom lock configurations are also available: electronic, combination, individual keyed with master.

Belden® Cable Management

Networking Racks & Enclosures

Solutions for High-density Requirements

High-density Racking System

The Belden® High-density Racking System (HDRS), combined with Belden's leading connectivity products, allows optimal use of valuable real estate. Moves, adds and changes are truly easy, saving you time, money and stress.

Belden's racking system has a well-engineered platform that offers you a high level of versatility and flexibility in systems design.

The High-density Racking System (HDRS) shown with half-doors, vertical and horizontal managers and fingers; also outfitted with patch panels, patch cords and cabling to demonstrate the dense volume this system handles.

Smaller Footprint Enclosures

The 24" width of Belden XSL, XUS(S) and XUSD(S) Style enclosures require a smaller footprint for installations where space is at a premium, such as in Data Centers. This width also matches computer room floor tile for added convenience.

XSL Data Slim Enclosure with glass front and perforated rear doors, side panels and EIA mounting rails installed.

Style and Footprint Options for Networking Enclosures

OPTIONS

STYLE	HEIGHT	WIDTH	DEPTH
XST Data Standard	48", 72", 78", 84"	29"	30"
XDP Data Deep	72", 78", 84"	29"	34"
XSL Data Slim	48", 72", 78", 84"	24"	30"
XUS Ultra Server	78", 84"	24"	36"

STYLE	HEIGHT	WIDTH	DEPTH
XUSD Ultra Deep Server	84"	24"	42"
XUSS Seismic Ultra Server	84"	24"	36"
XUSDS Seismic Ultra Deep Server	84"	24"	42"
XNM (NEMA-12)	84"	29"	40"

Networking Racks & Enclosures

XST Data Standard Enclosure with glass front and perforated rear doors, sidepanels and EIA mounting rails installed. Part No. shown: XST84-3-102420

Data Enclosures

XST Data Standard Style: 29" Wide x 30" Deep

XDP Data Deep Style: 29" Wide x 34" Deep

Applications

Especially designed for networking and telephony applications, the mounting width of these enclosures is field adjustable. Rails can be positioned for 19" or 23" EIA mounting. These enclosures offer a choice of two depths. The Deep version accommodates servers, UPS units, controllers, battery back-ups, network monitors and more.

Design & Structural Features

- Freestanding welded frame with modular construction.
- 29" wide x 30" or 34" deep footprint.
- Frame heights: 48" (XST only), 72", 78", 84".
- Mounting rails can be adjusted to 19" EIA or 23" EIA spacing.
- Grounding Kits available - see Components and Accessories section.

XDP Data Deep Enclosure Frame with EIA mounting rails installed.

***Notes:**

- 1) 19" rack mount PDUs will work on all XST/XDP Enclosures, for use with 19" mounting rails.
- 2) 4' PDUs will NOT work on XST Enclosures 48" or less.
- 3) 2' PDUs will work on all XST/XDP Enclosures.
- 4) 66" PDU's will NOT work on any XST/XDP Enclosure 48" or less.

See the Power Distribution Products section of this catalog for more information.

XSL Data Slim Enclosure with glass front and perforated rear doors, side panels and EIA mounting rails installed. Part No. shown: XSL84-3-102420.

Data Slim Enclosures

XSL Data Slim Style: 24" Wide x 30" Deep

Applications

This freestanding enclosure features a 24" footprint to match computer room floor tile. Ideal for use in Data Centers or other areas where space is at a premium.

Design & Structural Features

- Freestanding welded frame with modular construction.
- 24" wide x 30" deep footprint.
- Frame heights: 48", 72", 78", 84".
- Allows for mounting of 19" wide equipment.
- Includes two pairs of EIA-310 style mounting rails with hardware.
- Includes casters and levelers.
- Grounding Kits available—see Components and Accessories section.

XSL Data Slim Enclosure Frame with EIA mounting rails installed.

Hole Pattern for Vertical Lacing Panels

Pattern has been designed to accommodate a variety of wiring options. The .375" square holes accept a 'cage' style nut. The .250" dia. holes can be used for cable ties, 10-32 screws and nuts, or for attaching bracketry with push-in plastic rivets.

Networking Racks & Enclosures

XUS Ultra Server Enclosure with front and rear doors, side panels and EIA mounting rails installed. Part No. shown: XUS84-3-124420.

XUSD Ultra Deep Server Frame with EIA mounting rails installed.

Optional Anti-tip Device protects the XUS and XUSD Enclosure styles from tipping when servers and shelves are extended.

Ultra Server Enclosures

XUS (Standard) and XUSS (Seismic Rated) Styles:
24" Wide x 36" Deep

XUSD (Standard Deep) and XUSDS (Seismic Rated Deep)
Styles: 24" Wide x 42" Deep

Applications

Especially designed for server farms and Data Center applications, these enclosures offer a choice in depths: 36" XUS/XUSS style and 42" XUSD/XUSDS style. The greater depths these enclosure styles accommodate are ideally suited for standard servers and blade server hosting.

Design & Structural Features

- Freestanding welded frame with modular construction.
- Frame heights: 78" (XUS only), 84" (all styles).
- Allows for mounting of 19" wide equipment.
- Includes three pairs of EIA-310 style mounting rails with hardware.
- Includes casters and levelers.
- Perforated doors feature low resistance pattern (63% opening) to optimize cold aisle/hot aisle layout.
- Forced air heat removal options:
 - fanned top (up to 550 CFM)
 - fanned rear door (up to 940 CFM)
- Grounding Kits available—see Components and Accessories section.

The Ultra Server Seismic Rated Enclosure.

Seismic Rated Version

The Ultra Server (XUSS) and the Ultra Deep Server (XUSDS) are available in a Zone 4 Seismic rated version. These enclosures have been tested and approved to meet or exceed Network Equipment Building System (NEBS) requirements for Earthquake Zone 4 conditions, Bellcore GR-063-CORE, Section 5.4.1 certification.

Co-Lo Server

2 and 3 compartment units are available on request.

Hole Pattern for Vertical Lacing Panels

Pattern has been designed to accommodate a variety of wiring options. The .375" square holes accept a 'cage' style nut. The .250" dia. holes can be used for cable ties, 10-32 screws and nuts, or for attaching bracketry with push-in plastic rivets.

Networking Racks & Enclosures

XNM Style NEMA-12 Enclosure with front and rear doors, side panels, EIA mounting rails and optional side-mounted Air Conditioning unit. Part No. shown: XNM84-3-112120.

NEMA-12 Enclosures

XNM Style: 29" Wide x 40"

Applications

Dust free enclosures with an overall depth of 40" help organize and secure process control equipment, servers, UPS systems and battery back-ups.

Meets Nema-12

This enclosure is NEMA-12 compliant.

Design & Structural Features

- Dust free environment.
- Freestanding welded frame with modular construction.
- 29" wide x 40" depth.
- Frame height: 84"
- Mounting rails are adjustable to either 19" or 23" EIA spacing.
- Grounding Kits available – see Components and Accessories section.

3-point compression style lift and turn latch system.

Optional secure flush keyboard compartment with lock.

Distribution and Server Racks

High-density Racking System

HDRS Modular System of Racks and Components

84" Height with 19" or 23" Mounting

HDRS Modular High-density Racking System

Applications

These high-reliability products have been designed specifically for networking environments – from telecom closets to world-class data centers – to help you make the best use of valuable real estate and simplify MACs (Moves, Adds and Changes).

The HDRS is a well-engineered platform that offers you a high level of versatility and flexibility in systems design for ultimate network density and manageability.

How It Works

Create exactly the racking system you need from our selection of steel and aluminum distribution and server racks, combined with more than 50 standard cable management components and accessories. These items have been designed for complete compatibility and integration. The components include:

- Distribution and server racks in aluminum or steel, knockdown or welded; 2 or 4 posts.

- Choice of low- or high-density vertical cable managers in single or double-sided configurations.
- Two symmetrical manager half doors.
- Horizontal cable managers with bend radius control and double hinge cover.
- Accessories: Retention Gates, Divider Bars, Transition Channels and more.

How To Order

Select any of the Distribution and Server Rack styles (see Technical Specifications tables in the following pages).

Select any of the Vertical Cable Managers listed for Distribution and Server Racks (see Options tables in the following pages).

Choose any of the Accessories for the BHV Vertical Managers, Horizontal Managers or Transition Channels (see the Options tables in the following pages).

HDRS Vertical Manager Capacity

SINGLE-SIDED MANAGER				# of cable 35% fill

Distribution and Server Racks

High-density Racking System

System Features

Unmatched density

- Designed to work hand-in-hand with Belden connectivity and cable products for unmatched density – cable management fingers align with rack RU's allowing for patch cords to be routed directly to the vertical manager without need for a horizontal manager.

High level of modularity

- This hallmark feature of Belden's racking systems is enabled by ease of removal or movement of components, as well as by the wide selection of components we offer.
- The completely interchangeable cable retention gates, doors, fingers and accessories in our systems allow you to adapt them to your own specific needs.

Vertical manager part sets

- Each vertical manager configuration includes a complete set of necessary basic components, including doors (on high-density managers), gates, push-in fasteners, cable strap mounts, cable retainer bars and mounting hardware.

Modular, removable finger sections

- Available in high or low density. For high density, these come in handy 11U high sections and screw into a vertical manager. The finger sections can be conveniently taken out during reconfigurations and modules are easily replaced if fingers are broken. On the high-density manager, the fingers are aligned with the rack units, allowing for patch cords to be routed directly to the vertical manager. This eliminates the need to use a horizontal manager and saves space.

System scalability

- The HDRS is very easily reconfigured and modified to handle future system growth, add-ons, or changes.

Compatibility of vertical managers

- Compatible with any EIA-310-D compliant 2- and 4-post racks.

Mixed media application

- Designed to handle both copper and optical fiber structured cable networks.

Accessory mounting holes

- Quarter-inch diameter mounting holes run entire length of each vertical manager to permit easy attachment of accessories – e.g., cable bundle fasteners.

Any-point-to-any-point routing capability

- It's easy to route your cable from a given patch panel to another panel within the same rack, to the back of the rack, or to an adjacent rack, while still maintaining the proper cable bend radius.

Easy installation

- Requires only the use of standard hand tools to install in minutes. After initial installation, reconfiguration and modification of the system in the field will be a snap.

Great aesthetics

- The professional look of Belden's sturdy new rack system, with its highly aesthetic flat-black finish, is suitable for display in any world class telecom environment. You'll be proud to show off your investment.

Networking Racks & Enclosures

Distribution & Server Racks

XDR (Standard) and XDRS (Seismic-rated) Type Steel Distribution Racks

BHHR Type Aluminum Distribution Racks
XDR Server Racks

Zone 4 Seismic-rated Distribution Rack Type XDRS. Part No. shown: XDRS8419-610.

Applications

Belden offers a complete line of open racks and rack accessories from single rack applications (retail, telecom closed) to high-density, multi-rack patching and switching fields (computer room, data centers, central offices). Belden's unique cable and connectivity expertise was central in the design of a feature-rich racking system: ease of installation, ease with MACs and highly scalable.

Rack Features – 2- and 4-Post

- EIA-310 compliant, choice of 19" and 23" mounting.
- Equipment mounting hardware is included.
- 2 post rack uprights are front and rear tapped.
- Easy rack unit identification for faster install.
- Grounding stud standard on all 2 post and 4 post racks.
- Steel or Aluminum construction.
- Seismic certified options.
- Knockdown or welded construction.

Selection of Distribution Racks 2-Post

XDR Knockdown Steel Racks, #10-32 Tapped Front of Rails, 3" Channel with Base Kit or Angle Base

Heights: 48", 72" (with base kit) and 84" (with base kit or angle base)

Width: 19" or 23" mounting

Rack Kits

Rack Kits – 2 post

Rack Kits are designed for copper cabling. BH type vertical managers (See pages 27, 30) should be used for copper/fiber systems.

Rack Kits are available in welded and knock-down construction. All units feature one rack with either one or two vertical and two horizontal channels.

AX Copper Rack Kit – Welded or knockdown, two vertical and two horizontal channels

Height: 84"

Width: 19"

Color: Black

AX Floor Mount Rack – Welded (19" only) or knockdown (19" or 23"), two horizontal channels

Height: 84"

Width: 19" or 23"

Colors: Black

AX101174 Rack Kit - Includes AX101180 Vertical Managers (2) and AX101178 Knockdown Rack with Horizontal Channels (2)

Swing Racks

XSW Type Free-Standing Swing Rack

The Swing Rack provides easy access to the rear of rack mounted equipment in a free-standing environment. It is ideal for applications where space is limited and rear access is essential.

- Rack can be assembled as a left or right hinge and open 90 degrees.
- Rack can be positioned as close as 7" from wall.
- Equipment up to 18.5" deep can be pivoted.
- Cable management allows for cable routing without interference of the swing rack.
- Racks can be bolted side-to-side.
- Friction lock prevents rack movement while servicing.

Wall Mount Racks

Wall Mount Racks

Wall Mount Racks are available in two styles: Hinged and Swing-out. The Hinged rack is 12" in height and features an adjustable lower shelf (adjusts 2" to 6"). The Swing-out rack is available in heights of 36" and 48" with 19" mounting rails. 2U, 4U and 6U Wall Mount Brackets are also offered for mounting a limited number of components or pieces of equipment.

Broadcast Racks & Enclosures

Advantages in Using Belden Broadcast Rack and Enclosure Series

Engineered for Performance and Ease of Installation for Broadcast, Audio/Video, Security, Head End and Mobile Telecom Applications

Belden, the leader in the design and manufacture of high quality, highly reliable cables, has designed the Broadcast, Audio/Video and Security Rack/Enclosure Series using the same set of top quality and user-friendly principles.

Key rack/enclosure design criteria include uncompromisingly strong and well-built structures — along with component features that have been designed specifically to optimize the performance of the cable and to provide extraordinary flexibility in cable management.

These features provide you with a unique and highly-informed approach to your equipment housing and storage needs — with the following pages detailing the breadth of our rack/enclosure offering for the entertainment, security and telecom industries.

In addition to the products presented here, Belden offers a complete array of shelves for 19"-mount racks and enclosures: cantilevered, 4-point mount, sliding and keyboard-type (see Components and Accessories section).

Features

Construction

- Welded frame construction for greater strength and support is standard on all products.

Accessories

- A full complement of accessories will outfit your enclosures with the needed mounting, shelving, work surfaces and cable management support.

Ease of Installation

- EIA rails are marked with rack space increments for ease of equipment mounting.

Cable Management

- Numerous top and bottom entry points simplify cabling.
- The rounded, steel-formed cable tie bar (Photo A) reduces pressure points.
- The multiple attachment points for our Quick Mount System — or Nylon ties along the mounting rails, rail supports and cable tie bar (Photos B & C) — provide the utmost flexibility in cable routing and lacing.
- The Quick Mount fastening system (Photo D) is comprised of a unique swivel base and base fastener. Velcro ties are easily threaded through the fastener base, allowing the cable bundles to be secured to the rack. The system's swivel base allows for a 90° angle between the cable bundle and the cable tie to allow pressure distribution along the cables.

Aesthetics

- Powder coating process provides a textured black finish for a highly resistant, high-end look that showcases your equipment.
- Aesthetics can be tailored to your requirements with a variety of door and panel options, including use of tempered glass.

A.

B.

C.

D.

The enclosure shown here is the XMER Style (Media Enclosure).

Temperature Control

- Perforated and vented doors, along with a variety of top panel options, provide flexible cooling options.

Power Distribution

- A complete line of Belden power distribution units will accommodate your specific power distribution needs.
- Grounding studs allow for integral grounding of enclosures and accessories.

Belden offers four series of high-quality enclosures and racks for your unique entertainment, security, head end and mobile telecom applications.

Broadcast Racks & Enclosures

Advantages in Using Belden Broadcast Rack and Enclosure Series (Continued)

Features and Benefits

The following features are also standard on all Belden Broadcast Racks and Enclosures, except when noted.

EIA Rail Kits

- Rails are made of 12-gauge steel (XSF uses 16-gauge steel).
- Use standard EIA-310 hole-pattern (10-32 or 12-24 tapped holes).
- Fully-adjustable depth; designed to be moved without need to remove rail support hardware.
- Mounting hardware supplied with rack.
- A series of lacing holes along the rails allow for the easy attachment of cables. Holes are also compatible with our Quick Mount fasteners.
- RU marking on all rails facilitates equipment mounting.
- RU marks are hidden once the equipment is mounted.

Side Cable Chase

(Available on XMER Series)

- Adds 4" of valuable cable management space.
- Can be mounted to the side of the enclosure and is compatible with the side panels – or, can be mounted in between the enclosures to share cable management space.

Side Panels

- The tool-less surface-mounted side panels are quick and easy to install.
- Flush version side panels (available only on the XMF Series) can be installed in between joined racks (heat barrier) or end-of-row units without any additional floorspace requirements.
- Panels can be used to transform a rack into a free-standing enclosure or to close a row on ganged racks (enhancing the installed look and providing added security).
- Feature lifting handles for easy panel removal.

Doors

- Rugged and rigid construction.
- Doors mounted with lift-off hinges are capable of 180° swing, even when enclosures are ganged.
- Door swing is field reversible.
- Glass door uses anti-static tempered glass, allowing easy cleaning, rigidity and high-end look.
- Perforated door features 63% mesh opening allowing for minimal air resistance for optimized cooling.
- High-quality swing latch includes locking mechanism.

Top Panels

- Solid tops prevent dust from entering the enclosure.
- Vented tops allow for convection cooling.
- Solid top with 10" (550 CFM) fan for forced hot air evacuation.
- Solid top with four 4" (320 CFM), low noise fans for forced hot air evacuation.

Broadcast Racks & Enclosures

Advantages in Using Belden Broadcast Rack and Enclosure Series (Continued)

Features and Benefits (continued)

The following features are also standard on all Belden Broadcast Racks and Enclosures, except when noted.

Base

- 4" riser base allows for easy cable routing from rack to rack.
- Available in XMF Series: gangable 1, 2 and 3 bay bases with easy-to-use anchoring holes.
- Series of mounting holes allow rack to be secured using common nuts and bolts.
- Feature power outlet mounting openings with cover plate.
- Includes mounting hardware and grounding stud.

Recessed Caster Base

- Allows for easy positioning of the rack.
- Installs directly to bottom flanges of enclosure.
- Recessed casters allow the leveling legs to be lowered when the enclosure is in position and raises the casters off the floor.
- Includes hardware.

Vertical Lacing Bar

- 1" wide vertical lacing bar is supplied with mounting hardware.
- Mounts to the rail supports; fully adjustable depth.
- Series of lacing holes are compatible with Belden Quick Mount fasteners to provide flexibility in cable routing.

Vertical Lacing Panel

- Mounts to the rail support.
- Fully adjustable depth.
- Panel is 3" wide and features multiple lacing points.
- Ideal for attaching cable bundle.

Grounding Provision

- Belden racks are provisioned with grounding studs, enabling integral grounding of rack and accessories.
- The copper vertical ground bar mounts to the rack support.
- Fully adjustable depth.
- Bar is 3/4" wide x 1/8" thick.

Front-mount Work Surface

- Provides a convenient work surface.
- 16" deep, single bay (22") and double bay (44") width.

Rack-mount Drawer

- Convenient sliding storage drawers.
- 16" deep with lock.
- Available in 4 heights.

Quick Mount Fasteners

- Velcro hook and loop with cable tie mount and fasteners provide a quick, flexible way to route the cable bundle within the rack.
- Racks are designed with multiple attachment holes (rails, rail supports) for flexibility, ease of installation, and to protect cable integrity.

Power Distribution Units

- Extensive offering.
 - Insulated grounding versions available.
 - Climate monitoring option available.
- (See Components and Accessories Section).

Shelves

- Broad selection for 19" mount racks and enclosures.
 - Cantilevered, 4-point mounted, sliding and keyboard styles.
- (See Components and Accessories Section).

Broadcast Racks & Enclosures

XSF Broadcast Rack
available in 14 heights
and 3 depths.

Part No. shown here:
XSF4730100000
(47RUs H x 19.19"W
x 30"D).

Slim Frame For Broadcast and Mobile Telecom Applications

XSF Series Racks: 20.5" (10RU) to 87" (48RU) Height

19.19" Wide x 18", 24" or 30" Deep

Stand-alone or Gangable

Applications

The ultra-slim XSF frame has been designed to minimize the footprint for installation and use in mobile TV trucks. The narrow 19.19" width will accommodate standard 19" mount equipment. The frames gain strength when ganged together in a series.

Design & Structural Features

- Available in 14 heights and 3 depths.
- 11-gauge steel, one-piece formed top and bottom; 11-gauge steel formed vertical corner posts.
- Optional aluminum, weight-saving version available on request.
- Front corner post contains EIA-310 hole pattern: 10-32 or 12-24 tapped.
- Rail support channels are 16-gauge steel, riveted and welded in place.

Ease-of-Installation

- One pair, 16-gauge steel EIA rails, moveable front to rear in .625 increments.
- Each frame is supplied with 10-32 or 12-24 clip nuts for attaching equipment to the rails.
- Holes in side flanges of each corner post are available for ganging purposes.
- Open bottom with hole pattern to bolt frame to floor. Captive grounding studs in bottom sills.

Color

Black durable powdercoat.

ganged arrangement.

HOW TO ORDER

Part number example: XSF2824100000

XS F Enclosure, 28 RU, 24" depth, with 10-32 tapped frame, no top panel, no rear panel, no side panels, and no power strip.

The diagram illustrates the components of an XSF Enclosure. On the left, a box labeled 'XSF' is connected to a light blue box labeled 'RUS'. To the right of 'RUS' is a table listing rack unit (RU) heights from 10 to 48 inches. Further right is a box labeled 'FRAME DEPTH (in.)' with a table showing depths of 18, 24, and 30 inches. To the right of the frame depth is a box labeled 'MOUNTING RAIL KIT' with a table showing clip counts for 10 and 12 inch rails. Next is a box labeled 'TOP PANEL' with a table showing a description of 'None'. To the right of the top panel is a box labeled '0', followed by another box labeled '0', and then a box labeled 'SIDE PANELS' with a table showing a description of 'None'. Finally, on the far right, is a box labeled '0' followed by a box labeled 'POWER STRIP (See Notes*)' with a table listing power strip specifications.

Broadcast Racks & Enclosures

Media Enclosure for Broadcast Applications

XMF Series Enclosures: 22.25" (11RU) to 103" (57RU) Height
22" Wide x 24", 30", 36" or 40" Deep
Stand-alone or Gangable

XMF Broadcast Enclosure available in 26 heights and 4 depths for maximum flexibility in designing broadcast facilities.

Part No. shown here: XMF4424102140 (44RUs H x 22" W x 24" D).

Part No. shown here: XMF4424100000TB (44RUs H x 22" W x 24" D)

24", 30", 36", or 40"
22"

Design & Structural Features

- Available in 26 heights and 4 depths to optimize versatility in designing studios or production facilities.
- 11-gauge steel corner posts; 11-gauge formed top and bottom members; 14-gauge formed rail supports.
- Four 12-gauge EIA mounting rails (10-32 or 12-24 tapped).
- Frame is provisioned to accept optional front and rear doors, side and top panels.
- **Reversible Doors:** Surface mount solid, 16-gauge doors or top and bottom vented styles.
- **Side Panel:** Solid, 16-gauge flush side panel or 1-piece formed surface mount panel. Surface mount panels add 1/2" per side to overall width.
- **Top Panel:** Solid, vented or with 10" fan.
- **Vertical Spacing Panel:** Easy-to-install; 2.75", 3.66", 4.40" and 5.50" widths; 11RU-57RU heights.
- **Riser Base:** 4" height, 1-3 bays; fully-welded, gangable; convenient power outlet openings with covers; anchoring holes supplied to ease installation.
- **Caster base:** Recessed; 20", 30", 36" and 40" depths; adds 2.5" to height of frame. Caster bases install directly to bottom flanges of enclosures. Casters are recessed, allowing the leveling legs to be lowered when the enclosure is in position, which then allows the casters to be raised off the floor.
- **Rack-mount Drawers:** 16" deep sliding storage drawers with lock. Available in 4 heights. Mount on EIA rails (mounting hardware included). Compatible with all 19"-mount racks.

Cable Management

- Numerous lacing points on two surfaces of each rail support.
- Cable tie holes span entire length of EIA rail on the attachment flange (spaced at 1.75").
- Unique **cable tie bar** is made of formed steel to eliminate sharp edges; provides multiple attachment points; features cable bend radius control and lacing holes. Factory mounted when tie bar option is selected.

Ease-of-Installation

- Frame is provisioned for attaching a tool-less, formed surface mount side panel or a flat, flush panel. The flush side can be installed between joined enclosures without any additional floorspace requirement.
- Vertical spacing panels add valuable cable management space in between the racks. Includes two panels with attachment studs. Panel features lifting handles.
- Open top with optional configurable panels.
- Open bottom with hole pattern to bolt frame to floor or to a raised base. Captive grounding studs in bottom sills.
- Ganging can be accomplished after equipment is placed in rack.

Color

Black durable powdercoat.

Broadcast Racks & Enclosures

XME Enclosure for Broadcast, Audio/Video, and Security Applications is available in 4 heights and 2 depths.

Part No. shown here:
XME442641310
(44RUs H x 22" W x 26" D).

Part No. shown here:
XME442600010
(44RUs H x 22" W x 26" D).

Media Enclosure for Broadcast, Audio/Video and Security Applications

XME Series Enclosures: 48.87" (24RU) to 83.87" (44RU) Height
22" Wide x 20" or 26.5" Deep

Stand-alone or Gangable with integrated side panels

Design & Structural Features

- Available in 4 heights and 2 depths.
- 16-gauge, one-piece formed and vented sides; 16-gauge formed bottom and top.
- Top and bottom EIA rail support channels are an integral part of the top and bottom. Formed center rail support channels are spot welded to the sides.
- Two 12-gauge EIA mounting rails (10-32 tapped). Additional rails can be added (optional).
- Front and side ventilation for convection cooling.
- **Reversible Doors:** Frame is available with optional front and rear solid, glass or perforated surface mount doors.
- **Top Panel:** Solid, vented, with 10" fan or (4) 4" fans. Depths of 20 and 26.5".
- **Caster Base:** Recessed, depths of 20" and 26.5"; adds 1" to height of frame. Casters are recessed, allowing the leveling legs to be lowered when the enclosure is in position, which then allows the casters to be raised off the floor.
- **Rack-mount Drawers:** 16" deep sliding storage drawers with lock. Available in 4 heights. Mount on EIA rails (mounting hardware included). Compatible with all 19"- mount racks.

Bottom: 4 conduit knockouts, 2 @ .875" dia., 2 @ 1.125" dia.

9" x 2.25" opening with cover plate.

• Side access —

Top: 4" dia. knockout, located toward the rear

Bottom: 4" dia. knockout, located toward the rear

Optional edge guard to protect the cable is available.

• Top access —

1", 1.5" and 2" knockouts, located toward the rear of top panel

- Cable tie holes span entire length of EIA rail on the attachment flange (spaced at 1.75").

- Fully open top and bottom facilitate cable routing.

Ease-of-Installation

- Partially open top with optional configurable panels. Rear of top contains various electrical knockouts for cable entry.
- Open bottom with leveling legs and hole pattern to bolt frame to floor. Captive grounding studs in bottom sills.
- Ganging can be accomplished after equipment is placed in rack.

Color

Black durable powdercoat.

Cable Management

• Rear access —

Top: 3 antenna knockouts, each .625" dia.

2 conduit knockouts, .875" dia. and 1.125" dia.

9" x 2.25" opening with cover plate.

Broadcast Racks & Enclosures

Media Enclosure for Broadcast, Audio/Video, Security and Head End Applications

XMER Series Enclosures: 48.87" (24RU) to 83.87" (44RU) Height 22" Wide x 26.5", 31.5" or 36" Deep.
Stand-alone or Gangable

XMER Enclosure for Broadcast, Audio/Video, and Security Applications is available in 4 heights and 3 depths.
Part No. shown: XMER443131320 (44 RUs H x 22" W x 31.5" D).

Part No. shown: XMER443100000 (44RUs H x 22" W x 31.5" D).

Design & Structural Features

- Available in 4 heights and 3 depths. Taller units (48RU, 50RU and 52RU) available on demand.
- 14-gauge, one-piece formed top and bottom and 16-gauge formed vertical corner posts.
- EIA rail support is an integral part of the top and bottom with spot-welded inner support channel.
- Middle rail support channels are spot-welded construction of two 16-gauge formed rail channels creating .125" thick support channels per side.
- Four 12-gauge EIA mounting rails (10-32 tapped).
- **Reversible Doors:** Frame is available with optional front and rear solid, glass or perforated surface mount doors.
- **Side Panels:** Surface mount removable side panels. Adds 1/2" to overall width.
- **Top Panel:** Solid, vented, with 10" fan or (4) 4" fans. Depths of 26.5", 31.5" and 36".
- **Side Cable Chase:** 4" wide chase allows for added cable management. Can be mounted in between enclosures or used as a side unit; will accept a side panel. Available for 44 RU enclosures only.
- **Caster Base:** Recessed, depths of 26.5", 31.5" and 36"; adds 1" to height of frame. Caster bases install directly to bottom flanges of enclosures. Casters are recessed, allowing the leveling legs to be lowered when the enclosure is in position, which then allows the casters to be raised off the floor.

Cable Management

- **Rear access —**
Top: 3 antenna knockouts, each .625" dia.
2 conduit knockouts, .875" dia. and 1.125" dia.
9" x 2.25" opening with cover plate.
Bottom: 4 conduit knockouts, 2 @ .875" dia., 2 @ 1.125" dia.
9" x 2.25" opening with cover plate.
- **Side access —**
Top: 4" dia. knockout, located toward the rear
Bottom: 4" dia. knockout, located toward the rear
Optional edge guard to protect the cable is available.
- **Top access —**
1", 1.5" and 2" knockouts, located toward the rear of top panel.
- Numerous lacing points on two surfaces of each rail support facilitate cable management.
- Cable tie holes span entire length of EIA rail on the attachment flange (spaced at 1.75").
- Unique cable tie bar made of formed steel, eliminates sharp edges; provides multiple attachment points; features cable bend radius control and lacing holes. Factory mounted when tie bar option is selected.

Ease-of-Installation

- Open top with optional configurable panels.
- Open bottom with leveling legs and hole pattern to bolt frame to floor. Captive grounding studs in bottom sills.
- Ganging can be accomplished after equipment is placed in rack.

Color

Black durable powdercoat.

XWM Style

Applications

Wall mount enclosures, with their great aesthetic, rugged construction and cable management features, are perfectly suited for retail, office, telecom closets or any hosting applications where space utilization is critical.

Design & Structural Features

- Sturdy welded steel construction.
- Most units feature 19" mounting rails.
- Available with either a glass door with lock, or a steel door with lock, and 1 pair of 10-32 tapped rails.
- Heights: 24", 36" and 48".
- Width: 21.25".
- Depths: 6", 20" and 24".
- Direction of door swing is reversible in the field.
- Top and bottom fan knockouts each accommodate two 4" fans.
- Two laser-cut conduit knockouts, 0.885" and 1.110" diameter.
- Convenient laser-cut cable entry located on the top (3 X 3" dia.) and bottom (3 X 3" dia.) rear section of the enclosure.

48" High and 20" Deep Wall Mount Enclosure with glass door. Part No. shown: XWM-4820-GD-3.

48" High and 6" Deep Wall Mount Enclosure with glass door. Part No. shown: XWM-4806-GD-3.

24" High and 20" Deep Wall Mount Enclosure with solid steel door. Part No. shown: XWM-2420-SD-3.

Belden® Cable Management Components & Accessories

Vertical Cable Management

With over 100 years of experience as a cable manufacturer, Belden has a unique interest and capability in making sure our Vertical Cable Management products provide:

- Ease of Moves, Adds and Changes (MACs).
- Physical protection for cables.
- Cable bend radius control and reliable support to maintain electrical performance.

Horizontal Cable Management

With over 100 years of experience as a cable manufacturer, Belden has a unique interest and capability in making sure our Horizontal Cable Management products provide:

- Convenience and ease of use.
- Physical protection for cables.
- Management of the bend radius.
- Reliable support to maintain electrical performance.

Front-to-rear Cable Management

Front-to-rear Cable Management makes routing of cable neat, keeps cable secure and manages the bend radius. Cable managers mount in side panel opening.

Cable Ties

The Belden line of Cable Ties features miniature, intermediate, standard and heavy duty cable ties. They are available in tensile strengths ranging from 18 lbs. to 175 lbs. and are manufactured from various grades of nylon including weather-resistant nylon for use in sunshine/outdoor applications. They are offered in lengths from 4" to 48". Indoor ties are Natural in color; outdoor ties are Black. Velcro Cable Ties are also available. Belden nylon ties are UL listed and recognized.

Air Conditioning Units

Air Conditioners

In addition to the convection cooling options shown in the Enclosure section of this catalog, Belden offers side or rear mounted Air Conditioners ranging from 1,000 BTU to 20,000 BTU's. Listed below are shown available options.

These products are compatible with most Belden Enclosures. Please contact Belden Customer Service for more information and ordering.

- Easy to use temperature controller with alarm.
- Durable 16 gauge welded steel construction.
- Efficient, quiet and long lasting rotary compressor.
- CFC Free Refrigeration System.
- Space saving aesthetic cabinet design.
- Condensate evaporator unit available on demand.
- 100% factory tested.
- Designed to mount on enclosure while maintaining NEMA type 12 integrity.
- AC Units available from 1000 to 20000 BTU.

Fan Controllers

Electronic Fan Controller

- Remote temperature sensor with eight feet of cable allows mounting of controller in a convenient location while precisely monitoring temperature at any point within the cabinet.
- Digital display shows actual temperature and programmed setpoint.
- Universal mounting bracket allows mounting to EIA rails or enclosure frame.
- Temperature range from -20°F (-29°C) to 140°F (60°C).

Thermostat Fan Controller

- Low cost mechanical controller with internal bi-metal sensing element.
- Position controller inside cabinet where temperature is to be monitored.
- Universal mounting bracket allows mounting to EIA rails or enclosure frame.
- Temperature range from -10°F (-23°C) to 100°F (38°C).

Thermostat Fan Controller	9318-0200

Variable Speed Fan Controller

The Fan Controller 9318-0150 features two C-14 inlets with auto switching in the event of power failure. Three C-13 outlets are provided for remote and local control of connected fan speed. Fan speed adjusts automatically based on user defined temperature set point and temperature readings.

- Conserve energy, reduce fan noise.
- Web accessible remote monitoring, and maintenance
- Instant alarm notifications via SNMP trap, e-mail and/or audible buzzer
- Recessed 1U Horizontal mounting (1.72"H x 17.1"W x 3.52"D)
- UL Listed

Remote Climate Monitoring

Prevent an IT environmental crisis with these robust controllers that perform the following functions:

- Monitors temperature, air flow, humidity, dew point, door position, air pollution, smoke alarms and moisture via connected sensors.
- Eliminates use of splitters/CCAT's with built-in RJ12 and I/O ports.
- Visually supervises Data Center by interfacing web cameras.

- Sends alarm notifications to 5 cell phones/e-mail addresses.
- Observes equipment status via web-browser-based user interface.
- Allows viewing of data graphs and analysis of historical logs.
- Includes AC Adapter.
- UL Listed.

Power Management Products

Power Distribution Units with Remote Monitoring

The 9321-0100 Series PDU combines power distribution with remote power management and individual outlet power monitoring.

The 9321-0200 Series PDU combines power distribution with remote power management.

Both units include two RJ12 jacks for adding remote environmental monitoring sensors. Utilize your PDA to activate and deactivate individual outlets or outlet groups. The units feature Max Group Amps (MGA) which determines power outlet access based on actual power consumption. UL Listed

Power Distribution Units

Belden offers a broad selection of Power Distribution Units to accommodate the power requirements for your equipment. This family of durable and versatile power strips will streamline the power cord organization and minimize cord density in your enclosures. A sampling is offered here in a variety

of configurations to accommodate a broad range of requirements. However, Belden can supply many other Power Distribution Units to suit specific customer needs. All power strips have a UL and/or c-UL rating – refer to the table here for the rating of each specific unit. All units include a 10-foot power cord.

Mission-Critical Power Distribution Units

For operations where power must be managed and maintained at all times, Belden offers a family of Mission-critical Power Distribution Units. They are offered in a variety of configurations to accommodate a broad range of electrical characteristics, outlet requirements, plug and receptacle styles. All Mission-critical units include monitoring and a 10-foot power cord*. In addition, all Mission-critical power strips are UL and c-UL 60950 rated.

*10-foot cord length not available for 9416-0805 and 9416-1204. Contact Customer Service for more information.

Warranty & Shipping Policy

Warranty

Limited Warranty

Belden warrants that, for a period of one (1) year following the date of delivery to the original customer, the products it offers for sale in the catalog are free from defects in material and workmanship. The foregoing warranty is subject to the terms, limitations and conditions set forth below.

Liability

Belden's sole liability under this warranty will be to repair or replace, at its discretion, products that do not meet the specifications and descriptions provided in the catalog or purchase order due to defects in material and workmanship. Under no circumstances shall Belden be liable for any consequential or special damages for breach of this warranty. Belden's total liability under this warranty shall be limited to the price actually paid by the customer for the product(s) covered. Except as specifically set forth above, Belden expressly disclaims any other representation or warranties of any kind, expressed or implied, arising by law or custom, with respect to products set forth in the catalog or otherwise sold by Belden, including without limitation, warranties or merchantability, fitness for a particular purpose, non-infringement or any other matter.

Components Not Manufactured by Belden

Electrical components, air conditioners, fan assemblies, blower units and other components not manufactured by Belden, but installed in our products, are excluded from this warranty. Only such warranty that may be offered to Belden's customers by the manufacturer of such item(s) shall apply, subject to the terms, limitations and conditions thereof.

Conditions of Warranty

This warranty applies only to standard products set forth in the catalog. Custom products are covered by warranties stated in the Terms and Conditions of Belden's quotation at the time of the order.

Repairs or Adjustments

Belden, at its discretion, will make any repairs or adjustments to any products that are due to defects and/or workmanship. This warranty does not extend to any items that upon inspection by Belden are deemed to have been misused, neglected, improperly treated, improperly installed, or used in violation of instructions or specifications approved by Belden, or otherwise handled, installed, shipped or used in violation of industry standards for metal fabrication and solid state electronic equipment.

Shipping Policy

Freight Handling Charges

Third-Party Billing – Customer will specify carrier. Freight will be third-party billed other than to Belden or the customer.

The customer will supply a third-party account number or third-party billing address.

Freight Collect – Customer to specify carrier. Either a freight account number is provided or freight charges will be paid at destination upon delivery.

Prepaid and Add – Belden will specify carrier which has contractual agreements with select carriers.

All freight charges that appear on initial product invoice will be paid by the customer, and will not require any additional freight documentation. Belden's billing cycle will only indicate on the invoice a freight charge from dock to dock. Any accessorial charges (e.g., lift gate, union driver) will be billed on an additional invoice other than the initial billing that will show the accessorial charges.

Shipping Policy

Belden will provide estimated freight charges and will not be liable for charges due to problems that may occur in transit or upon delivery or not known at the time of the initial quote (accessorial charges). All shipments leaving Belden are FOB origin.

Inside Delivery – A carrier driver will make an inside delivery if an adequate loading dock is available to roll off freight to a trailer level dock. The driver will be equipped to move the freight via hand truck or pallet jack and must be able to get to the inside destination without any problem of obstacles that would cause delays. The customer must supply a freight elevator if delivery requires it. This action may result in additional freight charges.

Lift Gate Service – Usually a lift gate is needed when a loading dock is not available. The freight is lowered to ground level and delivered to the customer's door "only." Not all trailers are equipped with a lift gate and most carrier terminals have a limited number of lift gate trailers. This may cause a delay in shipment. This procedure may require an additional fee.

Notification – To coordinate delivery between the customer and the carrier, the customer must supply a phone number and contact person. This procedure may require an additional fee.

Reconsignment – Once freight has left the Belden dock, the delivery destination address will be scheduled in the carrier dispatch system. A change of destination address is possible, depending upon the timing of delivery. This action may result in additional freight charges.

Redelivery – When a delivery is refused by a customer for any reason, other than the fault of the carrier, the freight will be returned to the carrier's dock. A redelivery charge will apply.

Damages

All damages must be reported to Belden within three (3) working days upon delivery. Failure to report any damages will release Belden from any and all claims. It is the responsibility of the customer's receiving personnel to check all shipping cartons for discrepancies (e.g., dents, punctures). All discrepancies to the shipping container should be noted on the carrier's paperwork and documented. If, after opening the container, it is found that there is damage to the product, the carton is to be examined to determine that the damage was due to shipping.

Failure to examine cartons at delivery, and signing the carrier's paperwork, releases the carrier and Belden from any and all freight claims.

Third-party billing customers will handle any and all freight claim damage with the carrier and are responsible for all freight charges.

Return Policy for Repair, Replacement, Modification or Credit

Prior approval must be obtained for any products being returned. Upon approval an RMA number will be assigned to the items being returned. This RMA number MUST appear on all shipping documents and on the outside of each carton. Failure to include the RMA number on the carton will result in the refusal of delivery and return to the customer, freight collect.

All products returned for reasons other than repair or replacement are subject to a 15% restocking fee and must be shipped prepaid. In addition to the 15% restocking fee, the customer is responsible for properly packaging and returning the product in reusable condition. If not, additional charges may be added to the restocking fee. If a customer holds a product for more than ten (10) days, a return for credit will be voided.

Any or all special customized products can only be returned for modifications or repair of damages.

All products being returned shall be prepaid (unless they are being returned due to defect or damage), packaged in good condition and shipped to:

State-of-the-Art Facilities with Extensive Capabilities

The Belden Flexible Manufacturing System (FMS) is comprised of a totally computer-controlled line that incorporates motorized material storage, CNC Turret Punch Press, loading and unloading, right angle shear and conveyor sorting system capabilities.

Our facilities also utilize efficient robotic and laser systems to provide our customers with best-in-class manufacturing technology. This equipment ensures precision workmanship and repeatability – hallmarks of the Belden brand.

Robotic and laser system technology

Finishing

- Anodizing
- Irriditing

Engineering

- New product development
- Smooth transition from prototype to production
- CAD/CAM Technology
- Flat pattern lay-out, folding and unfolding of designs

Materials

- Cold rolled steel
- Stainless steel
- Special alloys

Powder Coating

Belden's Powder Coating facility uses an extremely durable and decorative powder using state of the art application and curing facilities. The powder paint process not only provides a superior durable and attractive finish that stands up even on products exposed to the elements for long periods of time, but is also economical and reduces our use of hazardous materials. The entire process is environmentally friendly, and is in complete conformance to both state and federal "Clean Air Act" guidelines. Finished goods are inventory-ready in our warehouse and can accommodate market fluctuations.

Efficient powder coating process provides durability and aesthetic value

Packaging and Shipping

Metal enclosures are packaged with protective corner posts, stretch-film wrapped and poly-strapped. Enclosures are normally shipped on individual pallets, reducing damage risk.

Manufactured units are carefully packaged for shipping

Belden design expertise allows for quick response to your specific project needs, including modification to standard enclosures or custom design.

Racks can be pre-assembled with patch panels, patch cords and other components

Units can be pre-assembled with electronic equipment, controls, sensors and cabling

Custom Capabilities

- Engineering and design expertise
- Product modifications to standard enclosures and racks
- Custom design of metal enclosures, racks or components
- Pre-wiring or hard wiring of complex systems
- Pre-assembled enclosures or racks with patch panels, patch cords, or other connectivity
- Fabricated metal components and kitting services

Enclosure pre-wired with copper cabling
