

### NC397A Alphanumeric Pocket Pager

#### FEATURES

- Alphanumeric
- Two (2) line backlit display
- Easy to use large four (4) button design
- Configurable for audible or vibration alerts
- Matching belt-clip included

#### ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

Alphanumeric pager(s) shall be a Alpha Communications® **NC397A** Scope Geo 40A or approved equal. It shall have a large 2 line display and shall be capable of storing up to 65 messages. The unit shall have a four (4) button design for ease of operation and shall provide a choice of tone and vibrating modes for page annunciation. A matching belt clip shall be provided with each unit.

The **NC397A** can be programmed to receive patient call information from Alpha Communications® / Tektone NC300 or NC300II Nurse Call Systems. The alphanumeric patient call system shall be displayed as generated by the nurse call system and the pager shall generate annunciation either by sound or by vibration.

#### NC397A SCOPE GEO 40A ALPHANUMERIC PAGER

The **NC397A** Alphanumeric Pager is a radio pager receiver with a large 2 line display, and is designed for use with Alpha Communications® / TekTone NC300 or NC300II Nurse Call and HC345C Emergency Call Systems. The **NC397A** will store up to 65 messages. Messages may be selectively deleted or locked into memory. Messages not locked into memory are automatically deleted as new messages arrive beyond the 65 message limit, with the oldest message being the first deleted. The **NC397A** can be configured for annunciation via vibration or audible tones, and has one alarm for daily annunciation. The **NC397A** can be programmed to turn on and off at preset times each day.
