# Electro-Mechanical Product Bulletin

EL-0407-D

## SARGENT Releases SoloPlus™ Software; SofLink™ Plus 5 Discontinued

Effectively immediately, SARGENT has discontinued SofLink Plus 5 software (CD-SLP5) from the Electro-Mechanical offering. The software has been replaced with ASSA ABLOY SoloPlus™, an upgraded version that contains all the existing features of SofLink Plus. Additionally, SoloPlus offers:

- Compatibility with Microsoft® Windows® XP and 2000 operating systems
- Use with either a PDA or the DTD
- Updated user interface and improved access level management
- iUpdate feature to check for software updates

The SoloPlus software is used to program Profile Series v.G1.5 and 4293 Wall Prox units via a PDA or DTD, and also to store event trails from the KP Operated and Profile Series LK stand-alone locks.

NOTE: Upgrading from SofLink Plus to SoloPlus is not required unless you are going to use a DTD to program your locks, or if you require improved access level management. The current version of the SofLink Plus will continue to function.

SoloPlus can be ordered using part number CDSOLO1.

Please distribute this bulletin to everyone in your distributorship who specifies and/or purchases electro-mechanical products. Insert this bulletin in the Electro-Mechanical section of your SARGENT full line catalog.

For additional information, contact your ASSA ABLOY Door Security Solutions sales consultant, call SARGENT at 800-727-5477 or visit [www.sargentlock.com](http://www.sargentlock.com).
