

CM-333 Series Hybrid Battery Powered Switches with 1 Relay

CM-333 APPLICATION

Hybrid Battery Powered

Designed to retrofit non-powered push plate switches with sensor switches without any additional wiring.

These switches offer the longest alkaline battery life of any switch in the market, with the option for lithium batteries.

The SureWave™ family of touchless switches by Camden lead the industry in performance, quality and value - with a range of features unmatched by any other on the market.

The CM-333 hybrid battery powered touchless switch with relay provides 'state of the art' door activation while eliminating the spread of germs.

Battery powered touchless switches offer an adjustable operating range, selectable motion sensing and momentary or maintained relay operation.
