

TELGUARD

THE ALARM COMMUNICATION EXPERTS

HOMECONTROL FLEX

RESIDENTIAL INTERACTIVE SERVICE

HOMECONTROL FLEX

INTERACTIVE

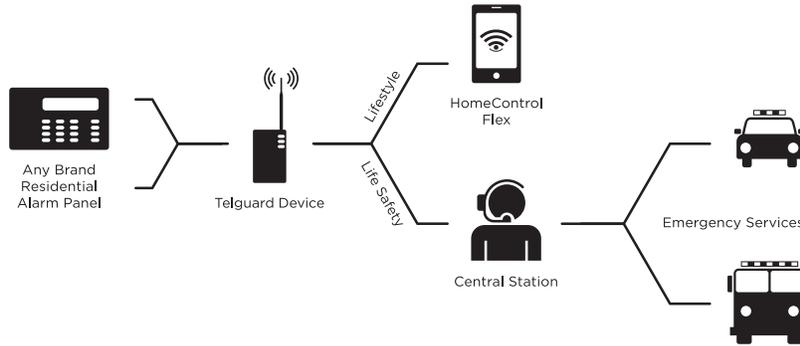

Telguard HomeControl Flex™ delivers total security system awareness, anywhere, anytime. Remotely arm systems, allow specific users to access and receive notifications of any alarm status change, easily and securely. HomeControl Flex tells users when their kids get home, or if their alarm system was not armed when they left for work.

It's peace of mind in the palm of their hand.

PRODUCT FEATURES

- Remotely arm and disarm systems from your desktop or mobile device
- Receive, SMS, and email notifications when the alarm status changes
- Access up to 5 sites under a single login
- Use Amazon Alexa to arm systems or check the status
- Available for iPhone and Android

When end users connect their security systems using HomeControl Flex, they can take advantage of hands-free Amazon Alexa voice controls to arm their system or check the status. If they have more than one property with HomeControl Flex, they can link them all into one login, allowing them to easily switch between multiple sites to arm a security system.

Common Compatible Alarm Panels

- All Honeywell VISTA panels
- DSC PowerSeries, NEO, 4020, and 5020 panels
- GE Concord 4
- GE Concord Express
- GE NetworX 6/8
- Many more...

Alarm Panel Requirements

- Contact ID reporting format
- Programmable output that can be set to armed status
- Zone on the panel that can be programmed as a keyswitch
- Opening & closing reporting must be enabled

Customized Dealer Portal

HomeControl Flex features a customizable portal where a dealer's logo replaces the HomeControl Flex logo, and a color theme can be specified to feature the dealer's brand prominently and give them a closer connection with their end users.
