Description

The SMART2200VS intelligent line-interactive UPS protects server, networking and telecommunications equipment from blackouts, voltage fluctuations and transient surges. Small-footprint tower UPS system occupies only 106 square inches of floor space with a height of only 14.25 inches. Large-capacity 2200VA/1600W rated UPS system offers seven minutes runtime at full load and 19 minutes at half load during power failures. Line-interactive voltage regulation corrects brownouts as low as 79V and overvoltages as high as 147V to fully regulated 120V nominal output for smooth continuous operation of connected equipment. Includes a total of nine outlets, three pairs of which can be individually powered off and back on via software interface to selectively reboot remote equipment or shed less critical loads to extend battery runtime for more critical loads. Includes two DB9 and two USB-enhanced monitoring ports for unattended shutdown, remote control and monitoring of UPS system and power data. Ships in attractive gray color scheme. Compatible with PowerAlert® and Watchdog service software.
