

TPE-1020SB

10-Port Gigabit Web Smart PoE++ Switch

TRENDnet's Gigabit Web Smart PoE++ Switch series offers advanced L2+ features with enhanced traffic management controls to meet the evolving demands of SMB networks. Contact us to learn more!

Web Smart Management

Provides an easy-to-use web-based GUI management for reduced switch configuration complexity, and offers a combination of SMB management features for easy deployment.

- 8 x Gigabit 95W PoE++ ports
- 2 x Gigabit SFP slots
- 180W PoE power budget
- Supports IPv6, LACP, VLAN, QoS, and IGMP Snooping
- 1U 19" rack mountable

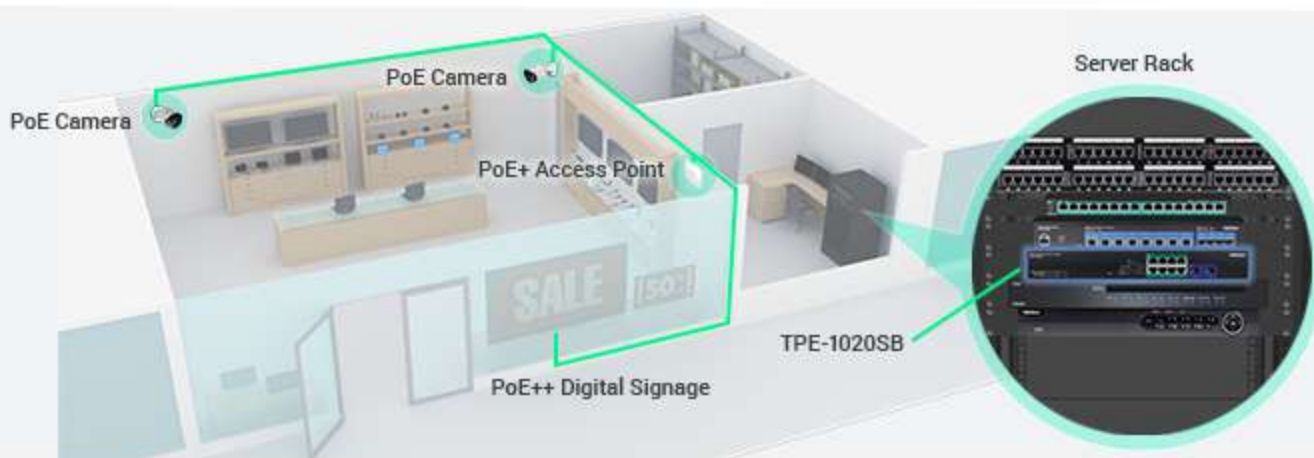

PoE Power

This managed PoE++ switch comes with eight PoE++ ports that can supply up to 180W of PoE power.

PoE Device Alive Check

PD alive check is an automated PoE self-healing switch feature. If a PoE device becomes unresponsive, the switch will auto-reboot the affected PoE port in an attempt to recover the device.
